Thread: [POST YOUR IDEAS FOR HACKING TOOLS HERE!!!! Veteran programmer ready to code!](#)

Vigor - February 6, 2014, 3:20 pm

Hey guys, I'm the coding mood and I need some ideas. Post them! I need lots! I'll take on board 1 idea.

Thanks guys.

Vladmir Putin - February 6, 2014, 3:38 pm

a program that reverse engineers runescape and injects code in it to fuck with the game and dupe things.

something that can copy and paste text from silverlight apps when your not allowed too

Vigor - February 6, 2014, 3:44 pm

The RuneScape thing is impossible since all their valuable information is stored on the server's side. In other words, you have absolutely no access to it just as a player.

I'll look into the silverlight thing but I don't know much about silverlight.

Continue posting your ideas!!!!

we r num 1 - February 6, 2014, 3:46 pm

Something that grabs a huge amount of Instagram names and makes them into a text file so you can either follow them or try to crack them. All I can think of now.

Swag Leader Juan - February 6, 2014, 3:47 pm

A usb based program that when you run on a computer it encrypts everthing till given a password.

Mac Macman - February 6, 2014, 3:48 pm

A fucking aimbot for dayZ. LoL jokes! This would be impossible... I think!!!

Vigor - February 6, 2014, 4:03 pm

Go here guys:

<https://hackforums.net/showthread.php?tid=4045001>

I am programming it in real time!

nubmerk - February 6, 2014, 6:23 pm

I dont know if this is possible but what about something where you can bypass the authentication for wifi networks. (you are already connected but need to use a username and password)

Kaos™ - February 6, 2014, 7:07 pm

maybe a current skype name generate that generates names to a text file to crack and maybe a cracker?

¹³³⁷ - February 7, 2014, 12:28 am

I need runescape pin logger i just give my blackshade net to my friend and now i need runescape pin logger that will be cool.

Vanilja - February 7, 2014, 12:32 am

(Feb 7, 2014 01:28 AM)lasski Wrote: [\[CITE\]](#) I need runescape pin logger i just give my blackshade net to my friend and now i need runescape pin logger that will be cool.Do you mean runescape bank pin logger?

In that case, it's not possible since it will be locked.

Password logger? Don't think it's possible either since you can only try few password / a minute or so.

If it's ip based then you might if you have a lot of proxies and some kind of bot which changes it always after a while.

djfoisal - February 7, 2014, 1:08 am

Hi Thyonic, Thanks for the amazing post... :)

Can you make an app for android that can hack all data like pictures, contacts, songs etc from victim's phone via bluetooth without pairing?

It would be great to get such app.

AzureSun - February 10, 2014, 9:48 pm

Can you make one where you can get the skype users password, to get on their account?

cptnhash - February 11, 2014, 7:25 am

Interesting. Would like to see what comes out of this. Will the resulting product be free or for sale?

papaeks - February 11, 2014, 8:15 am

Can you make a DDOS Tools for Ragnarok Private Servers? That can bring the server go down? Please make one :)

xedok - February 11, 2014, 8:42 am

Here are some ideas:

- 1.) Make good crypter. FUD.
- 2.) Make program that will try all the usernames and all the passwords (.txt files) of something like Instagram, some games etc..
- 3.) Make powerful RAT that has autospreading function (like worm)

And i have one very cool idea for mobile App but i will not post it here because it may be very good, and someone could use it. If you want we can talk about it.

Thanks guys.

DDoSSing tool :p

Flooders

Spammers

Password cracking tool

Wifi cracking tool

HackPack
KeyLogger
VirusMaker
Troll/Prank blue screen of death
Ip tracer
Ip logger
Done.

Just something thats free I would love them :) I have a folder for all those tools and programs.

DryBones - February 14, 2014, 3:34 am

Make a .lua script injector for league of legends like Bot of legends but free :P

?Saint - February 14, 2014, 4:18 am

Make a windows based wifi hacker. I see so many fake ones I don't think there are actually and real. A program like fern wifi cracker for windows.

?Sir - February 14, 2014, 4:21 am

A hotmail or yahoo generator.. Could be usefull for torrent spreading..

SIM-1538688 - February 14, 2014, 4:22 am

This will be a large project if you choose to do it, a site like hitleap but for ddosing.

You earn some type of point for helping with stress testing and you can have a small client run in the background that you can always have on and it will first test the connection speed and then limit itself to half that. Users can spread the program to their slaves you can also put up a market where users can sell their points for cash and you take a fee of the money since you're middlemanning inbetween the seller and buyer.

shreedugar - February 14, 2014, 5:37 am

Can you make a programme(Bot or something) which can automatically save a database from a website...For eg- If results are published on a website then you don't need to enter the roll number again and again....It'll automatically enter the roll number serially(say 8 digits) and will save every result to a Text file. I know its a simple bot programme but still i don't have much knowledge about these stuffs.

SIM-1472198 - February 14, 2014, 5:58 am

a program that can see private accounts in instagrams lol.
