I have no idea what you mean so I'll answer 2 interpretations:

A) You want to rat without an actual exe control panel: In which case look up a botnet.

B) You're having trouble port forwarding. Look up how to port forward your router. Go and get the make & model number then index it here: <http://portforward.com/>

just want one u run off a site

stupid short

**bandors** - February 7, 2014, 11:43 am

Do you just need someone ratted, or what?

**KL Lyons12** - February 7, 2014, 12:39 pm

yes, I need two people at least done
