So there's this "Regclean Pro"...

Where the F do stupids even get that thing from...

Recently at work people bring PC's for a regular checkup (Yeah we made a special offer but still), this program is almost on EVERY computer.

Assuming someone with a little spark of knowledge wouldn't bring their pc to us.

TL;DR (stupid)Customers computers clogged with Adware.

Any other favorite hates/annoyances comming to adware/toolbars?

I also hate Bing/Ask/Whatever toolbar, nobody wants it.

You can easily get rid of these by :

Uninstall them from your Programs Control Panel;

Remove them from your browser settings;

Download and run Junkware Removal Tool;

Download and run AdwCleaner;

Reboot

Easy as pie.

I was not asking how to remove them but your opinion/rage/hate on those programs.

I know how to get rid of stuff like that.

My opinion on these is based on how easy you can remove them, which means that yes they are frankly annoying bit once you know how to remove them, you don't care really after.

Corso - February 8, 2014, 6:56 am

Using [RevoUninstaller](#) to uninstall a lot of them, like the 'Severe Weather Alerts' adware, is a great way if [AdwCleaner](#) and [Junkware Removal Tool \(JRT\)](#) can't remove them.

As to others... You have 1,000s of these. Coupon Printer

Severe Weather Alerts

Snap.Do

Conduit

MySearchDial

MyPCBackup

Etc

The main factor of annoyance is that some installers do not even give you the option to NOT install them in the first instance, where some do.

Some yes are quite annoying while the others are removed in like five clicks.
