Thread: [Help Finding Female Slaves Pictures](#)

lonelycyberwolf - February 7, 2014, 9:34 pm

So, recently I got my first slave its a female I update the stub daily(2 stubs Main and Back-up). I've been looking for their pictures, but I can't find them I looked everywhere. I'm using Dark Comet version 5.3 I looked everywhere for hours by hand, then also did the search files option. I found .png and jpgs and other formats. But not what I was looking for I know this slave has pictures I watched her take them on remote desktop, also on her skydrive thats linked to her computer though she hasn't synced it for a long time(month). Also it really sucks that the webcam light is built into her camera it scared her when I turned it on for the first time, never did it again XD. Also if they hook the usb data cable/charger to their computer is there any way I can see this? I'd like to shift through their devices for more pictures. If you guys help me find her pictures op will post any xxx ones.(of course I have to blur out the face for obvious security reasons.) OP promises to deliver on the pictures. Useful information her computer is running windows 8, ASUS K55N-DB81.

Danke!

@ .Alerion Thanks for the back up, @ Sunlight that was Harsh.

Anyway, I won't post them if y'all don't want shes over 19 doesn't matter to me just a incentive to get answers. I honestly am just curious on where Windows 8 stores these files, also am curious about the usb thing. Its interesting to me just like Cryptography, and I'm simply experimenting trying to learn. I do research on this stuff and can't pull up anything, so I ask about it.

If she stored them on her skydrive, why don't you check her hotmail check her skydrive?

Because she never updates it. There's only a handful of pictures there it was last updated a long time ago. Also I did check everything like hotmail.

Did you check her junk? Maybe she deleted the photos

lonelycyberwolf - February 7, 2014, 10:05 pm

I've been waiting for them to afk so I can just remotely do it, but they never do lol. But more specifically I just want to know where windows 8 puts pictures like this. Because they don't show up anywhere. Though I seen the folder before?

Why would you rat for pics on purpose...

Okay ive seen some pussy of my own slaves but I'm not doing it for the pics I mine on my slaves and earn money of them.

photoshopp - February 8, 2014, 3:42 am

lol what a hardcore pervert you looked for fucking hours for some pictures? go watch porn mate

Whenever she is gone, open up the File Explorer and search "*" without the quotes. Should list all the files from recent.

OP, this is very fucked up. But since some people are just flat out perverts, there you go ^.

Adnad505 - February 8, 2014, 4:44 am

Ha fucking creep :O! Why do that? Just troll her open her disk drive

overdead - February 8, 2014, 6:53 am

Are you guys serious right now? How can you go off on him that hard just for wanting to get pictures of a girl. He probably wants to blackmail her so get off his dick...

Your Offline - February 8, 2014, 7:20 am

Holy Shit. -200 REP! OMG. How is that even possible?

Brutal Chaos - February 8, 2014, 7:59 am

What RAT are you using? And if you wanna find all the pictures easy search for *.jpg, *.jpeg, *.png and the other formats, if you still need help PM me.

SP33D. - February 8, 2014, 8:01 am

Open webcam, see her face , take a screenshot. The end..

SIM-2059193 - February 8, 2014, 11:42 am

this whole thing just seems like a stalker fanatic.

jarobi - February 8, 2014, 6:03 pm

Ratting :

If u watching girls --> its not ok

If u steal money--> its ok

????

How u can judge him? He can do what he wants. You doing the same shit. Stealing money is

much more fucked up....
