Thread: [HOW TO SHUT DOWN SCHOOL WIFI WITH ANDROID](#)

Murphys_lawless - February 8, 2014, 12:16 am

You'll find the download link at my mediafire folder posted on my user page. But be warned if you do this, it is illegal and any "competent" IT admin will have logged your IP the second you log on to the network again.

warlock994007 - February 8, 2014, 1:27 am

Can you send me the link for WIFI KILL , seems very interesting.

Murphys_lawless - February 8, 2014, 1:30 am

Nope, we talked about this. You know where it is now go get it, son.

Rackzen - February 8, 2014, 1:33 am

Well , my cousin's tablet , isn't Rooted , and it runs WiFi Kill bro !
Old method , anyways , thanks ! :)

Cherry. - February 8, 2014, 1:34 am

If you get caught, you're fucked bro. Just a little warning...

ashwinisCOOL - February 8, 2014, 3:33 am

Oh Well, If It Isnt Rooted and Can Run It Then That Is WIERD, Or You Can Run It But Cant Do Anything But Sit Around And Click Buttons and Nothing Happens!?? But If It Isnt Rooted And Can Run It Something Fishy Is Goin On!???

Yea I Know if I Get Caught I Get F U C K E D But Thats Why I Said Do It On A School That Doesnt Know Anything Such As Mine Were I Done It Around About 5 Times And They Were Blaming The Internet Provider!?????

Sos My Addict With Smilies!??

Litecoin - February 8, 2014, 4:10 am

Instead of shutting down all the computers and WIFI , go mine bitcoins on school computers ... WIN!

Ergo - February 8, 2014, 7:47 am

This whole thread is painful. It's physically painful. I think the worst part is that OP is saying that his school administrators don't know anything, and yet he's the one who's downloading skiddy programs. OP: Do you even know what the program is doing? I don't mean "it shuts off network herp derp", I mean explain what the actual program process is that can shut off the wifi. And in response to you saying your admins are shit: Have you taken into account they know more than you about networking? Have you thought about their actual job? They've set up the entire school network and you've done nothing.

Ignorance is bliss, and my god are you blissful.

Right on bro-man.

But OP, this really is a LQ thread.
And no, it doesn't always work.

Why shut down the school's wifi? What's the point, unless you wrote the program yourself?

PhoenixHF - February 8, 2014, 8:17 am

You are ignorant,too.
It is simple: Not everyone wants to know HOW the program does something.

l????? - February 8, 2014, 9:39 am

Not sure how this is a tutorial...

Maybe add a tutorial or description of how to use the program!

Thanks,
- Lunar

Murphys_lawless - February 8, 2014, 12:20 pm

Well children, since you asked so nicely (or rather didn't ask) I'll post a tut later on about hacking with a tablet running backtrack and we can play WiFi chaos for you people that need something more then a one button push to feel like you're an asshole. Expect it before the end of the month, mate.

chieffinj3ct0r - February 9, 2014, 5:50 am

will try on my wifi first just for testing :)
