What is the best JDB with silent addon (cheapest)?

Name all you know, and would recommend! Whatever price, but need to have silent applet :)

CRclaner - February 8, 2014, 11:31 am

I think JDBs are not worth buying anymore..

You know that the java driveby will affect only small number of your victims, wright?

Devsoft™ - February 8, 2014, 11:34 am

Yep, good times are over, and JDB's are no more effective.. =[You could use a regular download web-page. I have a free one, link in my signature.. =]

That is a pretty nice download web-page, I would also recommend OP to look into exploiting google urls. It is basically the same aspect as jbding except no need to worry about missing an infection, upon clicking the link the slave autodownloads your exe and actually executes it. The link looks as if it is merely a harmless google link and I have been using this for some time instead of jbding because at times some people do not always run the java applet etc. If you can convince someone into clicking a google link you basically can own them.

Also WingTsun to answer your PM since i cannot PM until 25 posts there is a tut here!:

Hmm.. so if o bought a JDB with silent addon for 70\$ is overrated?

N33t - March 5, 2014, 2:38 pm

JDB's are not worth buying anymore? Even if im just going to use it for personal usage? like tricking friends or so? If im going to buy some, who would you recommend? Must have silent addon.

N33t - March 10, 2014, 3:06 pm

Not much reply here, guess im off on an adventure!
