It is not even similar GUI wise, and these things are not really hard to make and very common in such tools. So I think not.

**john12** - March 17, 2015, 11:17 am

The GUI reminds me of another dox tool.

The op probably just decompiled it with Dot Net Resolver or a similar tool and changed the gui a little bit

FB resolver is bullshit. The only thing you can use is graph.facebook.com and it doesn't tell you shit. This guy is full of shit.
