I'll be paying thousands for a simple iphone ap developed.

Let me know and send me your portfolio or smthg.

My idea is really simple

What do you have that you want to be developed? I can't do iPhone, but I can do android. Is it a game or an app?

I'm looking for a game as simple as papi jump .

I'll be paying for HQ graphics.

That's not really the developer's end, as he'll just incorporate the Graphics, unless he's also a designer.
