iFeelLiFe - February 9, 2014, 4:05 am

Sorry, but you cant even hit people offline with that shit.

Natalie Dormer - February 9, 2014, 4:08 am

Sorry but your a few years late. Shells belong in the museum exhibit. this way -->

DarkSkullMate - February 9, 2014, 5:17 am

i said theres a powerful shells ;D lmao

aesad - April 7, 2015, 5:17 am

I reuploaded 1 :D. Enjoy it :P

Your UDP shells aren't very strong.

Tested against a small MC server with Castiel's Shell Booter.

Only a few lag spikes :(

5shane1 - August 11, 2015, 2:45 pm

Lol, UDP shells work if you know how to use them. I've token down some high-end servers.

CatChopper9 - November 10, 2015, 12:56 pm

i've dug here a bit. I have a few servers and need to start a simple stress test service. I am not a good web developer. So what can I do to start a site that people can buy my testing service. I dont expect lots of customers, but I want to try it out

limainfinita - November 10, 2015, 5:38 pm

most are dead

and there are several in the same server

chazfisher10 - November 10, 2015, 7:51 pm

OK this is so 2010 lol lol

Horus God - November 11, 2015, 4:53 am

not working got error " We're sorry, this site is frozen." ..

I agree, most of them are dead

CatChopper9 - November 11, 2015, 7:49 am

where may i find shells that i can start with? what do i need to do for a website. Even if someone has some web experience I would e willing to listen. Many post talk about buying web servers that are good, but I dont know where to find that. I have 2 from digitalocen that seem ok. but dont want to get

banned
