Thread: [Completely Destroy your facebook timeline And crash all facebook mobile users \(TUT\)](#)

neil5050 - February 12, 2014, 12:06 pm

Tutorial by Neil5050

<https://www.facebook.com/736151569751475> -> since we can host files on facebook servers

^ download the image I uploaded

1. Upload it to your timeline
2. Set it as your profile PIC

3. Go to your profile pic -> rotate left

4. If you visit your timeline again -> it should be broken (no one can see it)
  5. Try to go around messaging people, liking and commenting statuses
- People who were on my friendlist using the mobile app started crashing.  
Notifications/messagebox/etc all broke for them until I fixed my profile

6. How to fix your profile

[www.facebook.com/yourusername/allactivity](http://www.facebook.com/yourusername/allactivity)  
and remove the profile image

if you have any profiles with it feel free to comment here this is a big bug atm

if you like this tut

Please post if you guys get this to work -> this is a major bug in facebook.

(Feb 12, 2014 01:40 PM)Visual Basic. Wrote: [\[CITE\]](#) Haha, This is great. Definitely trying that one right now.

Yeah well facebook says it needs to be at least 180 pixel in width do you have any other .jpg file. ?  
Regards VB.

Are you uploading it on your timeline first and then setting your profile pic -> I just tested this trick last night

**sitono** - February 12, 2014, 5:49 pm

Confirmed this work. My profile would remain blank, as well for me friends. How ever the claim that mobile apps would crash would not be confirmed by me. Thanks for the tutorial.

Some people are trolls and other people like to grief and other people like to fuck with their friends.

Me I did it for 2 hrs and a lot of my rl friends were crashing on their mobile app and getting mad at me. I had to turn it off but it was still funny.

**Dean Winchester?** - February 13, 2014, 10:19 am

Could someone upload a photo of this?

Or is there just simply nothing in your timeline?

When you do this no one can access your timeline -> and try getting a friend to go to your timeline on the facebook app -> some people crash

I haven't tested it in a long time. Because a lot of friends of mine got pissed when I did it. But I am glad it worked for you.

i tried it to m.facebook.com

Won't work on m.facebook.com (that is the mobile browser).

When I tried it. It only crashed people on the actual fb mobile app that was located in the cell phone mobile store. Mobile app is totally different from testing it on the mobile browser.
