Hi Armani,

I purchased the 1 month license but it is saying that it will take 3 or 4 days to process the payment because you are not an authorized acceptor of payment. I understand your not suppose to be authorized so I am in no way faulting you.

I was just wondering if it was possible to receive the license without having to wait, if I sent you a paypal screenshot or something. I understand it is possible to cancel the order after you have given

me access so in no way am I expecting this.

I just thought I would ask as a good will gesture to a potential permanent customer.

Thank you.

(Would have pm'd but I don't have enough posts.)

Is it possible to give me the preferred DC configurations? The crypter is great and is fud but I am losing people on restart. The initial connection works, but they restart their pc and it doesn't come back. I don't use any settings extra features on the stub. I just use persistence and startup on the crypter.

This may not be an issue on your end I am just trying to eliminate possible causes.

Just wanted to say I am very pleased with this product. I was having an issue. The creator PM'd me his skype and did some troubleshooting with me. We figured out what the issue was and now he is giving me a free week of service. On top of that, the file is 0/35. I am very satisfied and I highly recommend.

Thank you Stryker

read the terms of service, we do not allow you to crypt botnet's like zeus etc... and we do not under any circumstance allow you to crypt files for other people, does not matter if its free or paid.

1. This is about the same price as any other crypter.
2. It has a C++ stub. (No dependencies)
3. It's web-based. You can access this from anywhere.
4. Faster then any crypter I've ever used.
5. I've talked to Stryker on Skype, and he always FUDs it as soon as possible

Hope this answers your question. ?

picpic - March 14, 2014, 1:30 am

Same price ?

Crystal Crypter : 50\$ / 3 months
File Guardian : 35\$ / 3 months
Diverse Crypter : 35\$ / 3 months
byte Crypter : 25\$ / 3 months

Only Data protector is almost as expensive.

But i Admit , a web based crypter is great and convenient ! ?

Hello Arman?,

Some crypters have a crypting problem in my case.

I am interested in your product but i want to ask it is support unicode, that is does it work on chineses, japanese,korean etc computer, and no dependancy.

plz tell me about it

Ecasrev - March 22, 2014, 9:41 am

Hey, I just scanned a file and i've gotten 5 detections for "Suspicious" and "/A" or something. I assume I could just like rename the file and lose these? Or have you been having issues with this.

me3ikan2 - March 22, 2014, 10:11 am

is this runtime FUD? or just scantime?

??Tommy - March 22, 2014, 5:27 pm
