How to hack Windows 7 Passwords
(works for XP and Vista too)

What you will need:

- 1) [Ophcrack](#)
- 2) Blank CD/DVD Disc

Steps:

1. Download Ophcrack depending on what OS you are hacking into (Windows 7, Vista XP)
2. Once downloaded, burn the image onto the disc.
3. Insert the disc into your computer and restart it
4. If done correctly, you should come across this screen:

[img]http://feb.imghost.us/Dnua.jpg[/img]

5. Now click Enter to continue
6. You should come across a screen like this:

[img]http://feb.imghost.us/Dnvu.jpg[/img]

7. NOTE: Ophcrack won't crack the password but you will get the NTLM Hash. Copy it (under NT Hash column)
8. Go to [CrackStation](#) which is an online hash cracking tool.
9. Type the NTLM Hash you copied earlier, enter the captcha, then press Crack Hashes.
- 10) Enjoy the password ?

This have been posted over 1000 times.

+ ophcrack is pretty useless if password is not in english

CarpKing - February 13, 2014, 10:21 am

does this work for windows 8 also? let me know asap

WealthyHustler - February 13, 2014, 10:24 am

or just boot up to the windows startup recovery, pick "save this scan", browse to your sys32, copy the sethc.exe (make backup). Copy your cmd.exe and rename it to sethc.exe. Press shift 5 times, net user (user) *
profit

Ray Reddington - February 13, 2014, 10:34 am

I'm not sure if it works for Windows 8. And i know its been posted, i just tried to clear it up a little and

reword it better for easier understanding

Are you stupid or what?
You cant use translated password to login ?

jackieo500 - February 19, 2014, 2:33 am

Looks good. Too bad it takes ages to crack anything

M4RTIJN - February 19, 2014, 2:35 am

Thank for this informative post!
This may become handy soon >:D

matt59000 - February 19, 2014, 4:31 am

Good tutorial, thanks for sharing, do you know where I can find a program like this for Windows 8 ?

hehiho - February 19, 2014, 1:15 pm

This will be help you only on your own computer.

HarveySpecter - February 19, 2014, 7:08 pm

Great tutorial OP going to give this a try.

Saduto - February 19, 2014, 7:08 pm

Great tutorial man Keep up the good work!

Nema problema brate haha ?

macnux - February 20, 2014, 5:08 am

i use another live cd that removes the password totally :)
