Thread: [Next facebook TUT: New Mobile verification trick for facebook](#)

neil5050 - February 13, 2014, 11:05 am

Before continueing onto this tut: I am tempted on making a chrome app to allow you to do hidden fb tricks that isn't available on the normal facebook browser. If anyone is interested let me know. Or I might upload more cool fb tricks. Also feel free to check out all my other fb working threads too

Also currently tempted to release a trick to bypass all mobile verifications for facebook.

<https://hackforums.net/showthread.php?tid=4056089>

On to the tut by neil5050

1. <https://www.facebook.com/settings?tab=mobile> Go there
2. Click add your phone number here
3. right click inspect element in chrome
4. Change code_sms to code_voice
5. after that it should give you the option to enable voice calls to your phone instead of text messages
6. warning its a bit buggy to get the voice thingy to work -> one thing I did was click cancel -> hit add phone number here again 3 to 4 times before it loaded a few times

```
<input type="radio" name="verification_type" value="code_voice"
onclick="CSS.show($('language_select_id'))">
```

^^ this helps for facebook verification purposes and there are till plenty of ways to get your facebook verified.

?Saint - February 14, 2014, 5:04 am

Awesome tut again man, keep 'em coming.

EDIT: Think it's patched already though. Could you confirm this?

neil5050 - February 14, 2014, 6:10 am

I did this last night when making the tut

still works I just did it right now jake -> a bit buggy -> thats all I will say -> if anyone wants help let me know -> if not I might do a video on this.

bernardbear - February 14, 2014, 3:59 pm

another post From You.. I appreciate it, Very Nice Trick, and you share with us.
I see your Rep+ increase step by step. Congratulation neil

Almighty - February 14, 2014, 4:02 pm

awesome man ! thanks for sharing this !

Sasaki Haise - February 14, 2014, 4:04 pm

Wow this is pretty legit, nice share man.

Inkling - February 14, 2014, 6:04 pm

Haha wow, it worked. I couldnt receieve their texts for some reason, but voice worked fine.

Resko - February 15, 2014, 4:46 pm

Very nice thanks for sharing this trick

Kevo - February 16, 2014, 1:40 am

Worked lmao, how did you find this though?

C=APHP?C=HA - February 16, 2014, 8:14 am

Brilliant. Spent the entire morning searching for free sms services that can receive texts, everything is either paid, used or non-working. Bypassing voice calls is much easier (probably the reason why FB doesn't allows it). Better start pumping those new accounts before Facebook patches it.

neil5050 - February 16, 2014, 10:12 am

I already got a few verification tricks but this one should help people out a lot.

Would be great to hear your other verification tricks. I'm actually having a problem trying to do the voice call right now, it's either not showing up at all or says that it's "overloaded" (hopefully doesn't mean that FB is working to fix it). One of my accounts still got limited after doing the voice call verification and now they demand that text bs all over again lol

neil5050 - February 16, 2014, 10:50 am

If I have time I might do one. Because I have had no trouble verifying accounts in fb.

?pth?n - February 16, 2014, 1:26 pm

Good work neil!

I have seen your previous tutorials aswell and some of them have been really useful.

Stay HQ ;)

neil5050 - February 16, 2014, 5:36 pm

Thanks I try to make a lot of my posts non copy and paste and usually try to reveal new material.

mo0000z - February 16, 2014, 9:26 pm

I wonder you if you actually work inside facebook.....how did you find this out?

manhast - February 17, 2014, 12:28 am

mmhhhhh looks interesting I'll try this later

Point3r - February 17, 2014, 2:30 pm

Thanks for this neat trick man! I'm really looking for working ways to verify fb accounts, but I don't understand something... What's the difference between verifying voice or text messages? I mean, if I can get a voice call, can't I get a sms code too? sorry for the n00bish question...

neil5050 - February 17, 2014, 3:01 pm

(Feb 17, 2014 03:30 PM)Point3r Wrote: [\[CITE\]](#) Thanks for this neat trick man! I'm really looking for working ways to verify fb accounts, but I don't understand something... This only serves as a verification purpose - text messages by facebook never usually recieve. And voice calls usually work. So this makes the facebook account verifying easier.

NEW TUT COMING SOOn -> PROBABLY THIS WEEKEND :)

multiplex - February 20, 2014, 4:14 pm

I'm confirming that this still works.

akramj - February 20, 2014, 6:15 pm

very nice trick thanks for sharing waiting ur new one

Hidden™ - February 20, 2014, 6:17 pm

This is legit as fuck, thank you for the share.

neil5050 - February 20, 2014, 9:42 pm

all my tricks are legit as fuck and my new one is coming soon.

amit007 - February 20, 2014, 9:56 pm

awesome... how can i use it to hack some1's profile.....

neil5050 - February 21, 2014, 5:32 am

(Feb 20, 2014 10:56 PM)amit007 Wrote: [\[CITE\]](#) awesome... how can i use it to hack some1's profile.....

There was actually an exploit that patched two days ago that allowed u to hack people's profiles

How it worked

1. <https://www.facebook.com/login/identify?ctx=recover>
2. changing it to search password instead of Email, Phone, Username or Full Name
3. So if I typed 123456 -> it will find me every single account that used the same password 123456

^ details to do this not leaking.

duude - February 21, 2014, 8:04 am

not bad, think i am gonna try this :-D

#ASH - April 11, 2014, 1:37 am

nice tutorial bro, it helps me alot :)

hehiho - April 11, 2014, 2:15 am

Doesnt work for me. How I can do this now?

Spoorloos040 - April 11, 2014, 6:06 am

ah this is great man i wonderd how to fix it and you just post it great share to the community

neil5050 - April 11, 2014, 4:43 pm

(Apr 11, 2014 02:15 AM)hehiho Wrote: [\[CITE\]](#) Doesnt work for me. How I can do this now?
It should still work. It's a easy trick too .

w3areanonymous - April 15, 2014, 8:51 am

thanks for sharing hope it works :)

~Kind Regards

neil5050 - April 18, 2014, 12:39 am

It should still work :) . Either way have fun with it

king - April 18, 2014, 1:12 am

The option for call . voice is present there without any inspect element modification

americanlegalinfo - April 18, 2014, 6:25 pm

Its not working now. all are patched.
they ask email, password ,username only.
how to do mate?

Ad?m - April 19, 2014, 7:49 am

Genius. Use this with k7.net and it works perfect. Gotta wait a couple min for the voicemail but it works.

trinity76 - April 21, 2014, 4:08 am

thank you for this tutorial I'll try it after

Estonne - May 31, 2014, 5:27 pm

Thanks !!

Keep going mate, you'r awesome ;)

Easybro - June 14, 2014, 12:56 am

Omg, thanks man. I dont have a phone anymore, so it was superhard to verify my account, thanks!

*Used this trick with k7.net

Wish i could hug you from here :p

neil5050 - June 15, 2014, 3:01 pm

A video would be great. Thanks indeed mate.

neil5050 - June 24, 2014, 7:06 am

Yeah I might make one. If you have any problems as of now, i can show you via skype.

LuLzKr3w - June 25, 2014, 8:30 pm

There is no point in making a video lol just click cancel and stuff like he said hella times on a proxy outside the us and it will eventually go to call and the bug isnt fixed. yet. butttttt message me I will give you a 100% way to verify facebook via an app. lol

neil5050 - June 26, 2014, 7:13 am

(Jun 25, 2014 08:30 PM)KiraSec Wrote: [\[CITE\]](#) There is no point in making a video lol just click cancel and stuff like he said hella times on a proxy outside the us and it will eventually go to call and the bug isnt fixed. yet. butttttt message me I will give you a 100% way to verify facebook via an app. lol

the method I posted does not require a proxy though

LuLzKr3w - June 27, 2014, 12:32 pm

(Jun 26, 2014 07:13 AM)neil5050 Wrote: [\[CITE\]](#) the method I posted does not require a proxy though true but in the sense of being in the us it doesnt allow you to call out unless you glitch it. other countries yes. but that app text me! will verify anything

neil5050 - June 28, 2014, 5:33 pm

(Jun 27, 2014 12:32 PM)KiraSec Wrote: [\[CITE\]](#) true but in the sense of being in the us it doesnt allow you to call out unless you glitch it. other countries yes. but that app text me! will verify anything

I live in the usa so I had to do this usually to verify my accounts easier. since some text messages never retrieve using facebook.

Only3 - August 9, 2014, 3:00 pm

this is a great trick by the no1 fb tricks finder

Talu - August 9, 2014, 6:03 pm

This looks interesting, will look into it.

Woundedmilk - August 10, 2014, 4:04 pm

<http://hackfbaccountlive.com/?ref=1020327>

d0s000m - September 9, 2014, 6:10 am

Any way to enable Texting SMS in Germany?
