Thread: [\[100\\$ OFF\] BetaCrypt >>>PRIVATE STUB ONLY>>>98% RUNTIME FUD>>>LONGEST FUD TIME ON HF](#)

N3oNight - February 13, 2014, 11:38 am

THIS IS A SECURITY SOFTWARE AND ITS USE IS TO PROTECT YOUR FILES AGAINST REVERSE ENGINEERING. WE'RE NOT RESPONSABLE FOR ANY OTHER USE YOU DO WITH THIS SOFTWARE. YOU'RE THE SOLE AND ONLY RESPONSABLE FOR WHAT USE YOU DO WITH THIS SOFTWARE.

Information:

Are you tired of using Crypters which do not function well? Tired of spending money on Crypters which advertise to have long FUD Time, but they are actually FUD for some hours because of the stub used by them is shared with 400 to 500 users. Well you are at the right place then. BetaCrypt is 100% Custom Coded by the Coder who also coded [SmartMiner](#) (First Ever Runtime FUD Miner), And yes, your guess is correct, that's me. I have been Coding Crypters since 2009. I have put all my knowledge and skills to make this Crypter to give the max FUD Time & Compatibility with almost all Applications.

By keeping all this problems in my mind I started working on a BetaCrypt which will be exclusively limited to 20 Users and each user will have there own Unique Stub. BetaCrypt Is very very simple, yet Very Powerful that it will give a very long FUD Out put for 15 to 20 days, Cause each user will have there own Personal Coded stub that won't be shared with any other User. And also each Created output will be Unique and dynamic that will lead to a Long FUD Time.

Whats make BetaCrypt different from others?BetaCrypt has been coded by a Professional Coder with 8 years of experience in the field

BetaCrypt Can Guaranty to Give a long FUD time of 12 to 25 Days(Approx) from the same stub which no other Crypter on HF does

Custom metamorphic engine technology Mutate Output Code for a Very Long FUD Time

High Compatibility, Works with almost every Software used on HF

Very Advance Persistence & Anti-Botkill features which makes it near to impossible to remove Installed file

High infection rate which will be around 9.2/10

Tested and Works Perfect with Unicode OS like Chinese, German, Korean

Will have a very small stub with a size of 12kb to 20kb(Without Icon)

Each of the 20 users will have there own unique stub which will ensure that your stub/Crypter wont be shared to any one else besides you

Each user will get direct support, instructions and help from me(Coder). As no one know my Code better then me

BetaCrypt has been serving customers for a long period of 2 years without a fail of downtime

Wow thread is looking nice everything is look great super vouch from me

Midna - February 13, 2014, 11:42 am

Nice man, I'm one of those lucky bastards that gets to use this crypt. I'm psyched!

N3oNight - February 13, 2014, 11:45 am

Thanks for the vouch buddy, I think I missed some features,
I will edit the thread tomorrow and also add some videos

Snizz - February 13, 2014, 11:55 am

One of the best coders on hf bringing you a product he knows a great deal about. GLWS man, I'll hopefully be able to pickup a copy later on :D

AkiraKiku - February 13, 2014, 11:56 am

Vouch for N3oNight. Happy to see a good crypter coming out on HF. Did business with N3oNight and this guys is the man! His service is top notch and don't think you find a better coder around here. Buy with confidence and you wont regret doing so.

N3oNight - February 13, 2014, 12:02 pm

Thanks for the Vouch Guys,
i can guaranty, this will be the crypter with longest FUD Life on HF.

RaidSec - February 13, 2014, 12:03 pm

Vouch. may be buying this in a day or two if this dosent sell out

frontenhack - February 13, 2014, 12:04 pm

Big Vouch for N3oNight, One of the smartest guys i know.
I reccomend buying this crypter ?

N3oNight - February 13, 2014, 12:06 pm

Thanks for the vouch and support Guys,
Much appreciated ?

I have been Coding Crypters since 2009. I have put all my knowledge and skills to make this Crypter to give the max FUD Time & Computability with almost all bots.

I have been studying the Crypter market of HF from Jan . I have seen Many users are having a big amount of Bots as they plan to use them on a large platform. But most of there Bots Die Quickly because they use a crypter which has 1 shared stub between 300 to 500 users & Also the AutoIT Crypters which have a very large stub of 800kb to 1 MB, which make Andromeda Server (14kb) to 1 MB ,when Crypted, which decreases the execution Rate.

By keeping all this problems in my mind I started working on a new Crypter which will be exclusively limited to 18 Users and each user will have there own Unique Stub. The Crypter Is very very simple, yet Very Powerful that it will give a very long FUD Out put for 15 to 20 days, Cause each user will have there own Personal Coded stub that won't be shared with any other User. Why Should I buy BetaCrypt? Can Guaranty to Give a long FUD time of 15 to 20 Days from the same stub which no other Crypter on HF does.

Very Simple, Sleek, drag and drop design which is very easy for even an newbie.

High Compatibility, Works with almost every Bot used on HF or any Underground forums

No Console window or Black window Popup which you mainly get while Crypting botnets like beta, andro or smock. (When PC starts after reboot)

Enable all the features from the server like Persistence , Process Injection & AV Killer. (makes your server hard to kill for PlasmaHTTP, PlasmaRat, Beta, Andromedia, Smock)

High infection rate which will be around 9.2/10.

Will have a very small stub with a size of 11kb to 18kb. (Without Icon)

Advanced Compression to get the output small then the server size. (if the server is not compressed)

The Crypter will be strictly limited to 18 users which will ensure long FUD duration then any other crypter on HF.

Each of the 18 users will have there own unique stub which will ensure that your stub/Crypter wont be shared to any one else besides you.

Each user will get direct support, instructions and help from me(Coder). As no one know my Code better then me.

Big vouch for this legit man. Using his Miner and have tested his crypting software and I'm only amazed about stability, features and power. Privat stubs of miner have been fud over days and mass spreading. Have tried after using some crypters from HF some privat crypting services from other forums. But this software kill all others.

roben81 - February 13, 2014, 12:41 pm

Vouch for N3o, deal with him many times (bots, crypter miner).

He is legit and friendly, also great coder!

Good luck with sales!

interested in this.. sending you a pm about purchasing..

DAVID001 - February 14, 2014, 9:27 am

Vouch for this him. Fast support from a highend member.

Incredibly infection rate !!!

The stub size is great !!!

He definitely knows what he does !!!!

Great ? Legit and trustworthy. Fast as hell.

N3oNight - February 14, 2014, 10:16 am

Impotent announcement:

New sales are paused for few days

I already got 6 orders and 1 more will be payed soon.

Each copy is coded manually, so It will take 3 days to complete all this 7 Orders.

I will start taking orders back after I deliver this copies.

Thanks for the support. ?

20 Day FUD Guarantee and high execution rates and with 90% of computers that atleast have .net installed, it's a good deal, especially when I don't want shitty bots.

This is an alternate option for the people who use crypters of HF with shared stub.

or for the people who want to target some bots as they can give them valuable info.

other crypters with shared stub get detected in a day or 2 and they lost there valuable bots.

This Crypter is for them.

I know its not for you as your got many ASM & C++ Crypters. ?

but Its for people who dont have 400\$ to buy board Crypter ?

And framework 2.0 Cant be considered dependency as its available by default on XP sp2, vista, 7 and 8.

And if its matters for them, then they will but board crypter for 400\$ and not my Crypter which is Just 40EUR.

The GRim - February 15, 2014, 1:18 am

All details are posted on the thread, you Can read again,
If you are Noob then you Can also take help from Google.

This is a private Crypter which is sold to limited Users.

You need to for ask if you are eligible or not.

But Because of you Noob question i assume you are a Noob and I wont sell it to you. As I want to maintain the Quality of the Crypter.

FantaŠec - February 22, 2014, 12:32 pm

If you want to buy a crypter that is used for infecting Nigerian computers with a 1mb output go buy razor or any other 'fud' crypter on this section, betacrypt is meant to be the way it is.

In which would are you leaving buddy,
framework 2.0 is by default in Xp sp3, vista, 7 and 8. and It wont be considered any major dependency as Its on like 90% all Computers.
and also there is no worth hacking windows 95 or windows 2000 PC. ?

Let me rephrase; you should make a C++ crypter.

Smaller output, and fud in most crypter a = 5/40 undetected. I didn't say change beta crypt, I just said he should make one. I remember multiple things he has made and all are good. I have tried and used 3+ of his products.

Out of 7, 3 Copy has been delivered,
the rest 4 buyers will receive them today ?

garrex - February 23, 2014, 4:25 pm

used it a little more today and it is an absolutely golden crypter!!!! fast, solid execution!!! not like some of the other shit that gets passed off here!!!

LeGenda?Y - February 24, 2014, 12:56 am

Just received my crypter, private builder and private stub totally.

FUD 0/35 and the server file was like 290 kbs (Originally 130kbs!).

This is definitely worth the wait, nothing is better than having your own builder and stub and not having to worry about people getting your stub detected for a long time.

HQ vouch for this guy and his products.

I'm not going to lie and I'll tell you about my experience.

When I paid for it he was very up front and honest and helped me out and stuck on skype till payment was received even when blockchain was down.

After paying I received the miner immediately great, played with functions. No problems.

I would say 24 hours later I received my crypter, first one didn't get a great scan result, nothing malicious just false positives so he set to work and sent me a new stub for my crypter and it's now FUD.

Overall it costs a lot but it pays for itself not having to recrypt the file each day or twice a day or however many times required. The time it took is worth the wait. This user only wants to sell the best and it upsets him when he sees other crypters and such selling a product that just doesn't live up to its name or does it's job...

Please if you're going to get a crypter make it this one.
If you're going to get a miner, get his.

This is my completed independent review of this product:

I had my doubts about this as people mostly promise stuff but never keep it, but after 24 hours I have gotten to know n3onight and his product and he is in fact man of his word and very good coder - but not only that I can vouch n3onight took many hours now to work and customise my product as I wanted it to be and the single detection that my unique stub had (probably because of my own screw up) he fixed it for free!

This guy is genuine and a motivated businessman!

You have my vouch sir! and good luck with sales

BIG VOUCH for this crypter.
I can't remember since how much time my stub make totally FUD output !!
All that i can say is: This crypter is the best that i never seen !

AzogNordic - April 17, 2014, 5:21 am

A really good crypter!

Only negative is that its .NET dependant.

Anyways, FUD a long time.

STUB IS 120KB!!!!!!

The stub is 12kb-20kb you must be counting the icon i guess, try removing the icon and you will get your size.

p0iz0ner - May 11, 2014, 8:14 am

I removed icon with reshacker...

File requires .net framework, isnt asm cant be 18kb.

Sc?rf?c3_ - May 11, 2014, 8:17 am

Sure it requires .net, is C# stub....the ASM should be referred to the injection part. The stub size is always intended without the resource!!

p0iz0ner - May 11, 2014, 9:07 am

scumbag idiots "C#/asm" 18kb.

In reality you copy and pasted an injection method and called inline asm "asm".

Took 10 seconds to figure it out since the thread is ONLY 8 pages.
But you are too lazy right?

And last, even the dumbest user on this forum wich is a bit familiar with coding can undertsand that if you code a full stub in ASM you have no convenience to add C# stuff in it an loosing your "no-dependencies".

So...if you were smarter you would easily and forcefully conclude that this stub is C# with ASM implementations.

Also the stub size is calculated on the stub WITHOUT the malware in it!! Not the resulting output!

Seems to me you are just tryng to justify yourself on your future (if not already done) chargeback....as you usually do, and get some FUD crypts for FREE.

You have not left me any other Option then to Ban you and I dont Care about you threatening me for the Scam report.

And as scare-face Pointed out I am clear with the facts that I have never said that stub is coded in Native language. but In many places I have Pointed out it dependencies and mentioned It works well with xp, vista, 7 and 8 and never said it will work with win 98 and win 2000.

I provide a special pack on request in which you get more then 1 stub at a time. in other words you can buy extra stubs and they do come with FUD Updates.

(Jun 12, 2014 09:36 AM)IronHD Wrote: [\[CITE\]](#) Does the stub is coded in C# and have a .net dependencie ?It requires framework 2.0 which is by default in xp sp2, vista, 7 and 8.

Even a simple program like skype requires framework 2.0. so Its basically not a dependence.

Bought this Crypter a few days ago and here are my first impressions:

So far I tested it with DarkComet 5.3.1 and it works almost perfect.

Servers are running stable and it really is FUD (RazorScanner 0/60).

Can't say much about FUD-times right now. Tested it for 5 days and my servers are still FUD. Let's hope they'll stay FUD a little longer ;)

Keep up the good work!

well I Just not Updated, currenty is 15/18 after this current sale.

Also I only sold 1 Copy in this Month. Currently taking less new buyers. Most of the current occupied slots are from some old buyers who keep renewing before there slot expires.

I believe in stability, Long FUD and Grate support which I am providing. My users are happy with it. so I dont give much time on Threads ?

@Op, can we get the best settings to use Beta with Nanocore, i keep losing the pc everytime, does the crypter have delay execution feature/ persistence?

Asorock - September 18, 2014, 5:08 am

Hello N3oNight, Thanks for your support yesterday, I was able to successfully crypt my darkcomet and Netwire and the the scan result was 0/35. But however I'm having a serious issue with the

crypted files , though i got the message that my files was crypted successfully, at first i tried to run the both files on my system with sandboxie to test and be sure is working and i got an error message, it couldn't execute , so i tried to run the both files without sandboxie, again it wasn't able to run/execute also . I also tried sending the both files to my friend to test run on his system for me , and the result was same.

Please I would appreciate if you can assist me to fix this issue as i'm yet to use the crypter . I have been trying to chat you up at skype but you not responding and also i dropped a PM for you.

I'm impressed for the scan result so far and highly recommend this crypter for everyone and I will post more of my vouch as soon as i'm able to use it and to confirm the infection rate and fud time.

First of all please tell what error you have?

I have experience with betacrypt and i never have problem with it.

Crypter has anty-sandbox feature so thats you can't execute is in sanbox, i sugest You to install vmware + windows xp/7 for test or buy some cheap rdp with windows.

What is file size? Did you tried open crypter on admin rights ?

Thanks Public.Enemy, after I tried to run the files on sandboxie, I also tried to it directly without on sandboxie, this time not on sandboxie. And i still got the error message "THE FILE STOPPED WORKING , CLOSE PROGRAM OR GO ONLINE TO CHECK"

For the file size; Darkcomet after crypting was 587KB while netwire gave 199KB

Please note i'm not saying the crypter got any problem, all i'm trying to say is that I think i'm not doing something right which i need N3oNight or anyone else here on HF who already have a good knowledge on how to use BETA ,to help me out fix the issue cos it's my first time.

I ran the BETA as an admin , and tried crypting another file (darkcomet). I got the message file

successfully crypted , i tried to test run it directly to infect myself and here on the image, is the error message i got. <http://prntscr.com/4o6nyx>

The "only" thing is the FUD time? Ahahah

You really don't know what you are talking about for REAL!

The most and main thing in a crypter is the FUD time.

Waiting 4 days for him to get it FUD again is unacceptable.

Surely he could check in at least for a few minutes each day, knowing that he has customers who might have problems. Access to skype & the internet is everywhere in 2014...phones, hotels, libraries, coffee shops, etc. If he isn't able to do that, then perhaps he should re-think offering this service.

Now it is day #5 and still not FUD nor any word from him....

@ All buyers : I am aware about the detection that occurred when I was off for 4 days.
I have started working on a Big update. Beta Crypter will be totally recoded again.
Some new features will be added to it as well as new and more user friendly GUI will be added.
I can not give a Fix time when it will be completed, but I will try my best to get it done in next 2 days.
All the users will get extra days with the new updates, Users who spammed my thread or PM box for update on some shitty detections will be ignored with this new Update.
I am here to get a Quality based Users as I am currently providing the best Quality on HF.
Sales are closed till then.

N3oNight - November 2, 2014, 8:20 am

New Updates,

BetaCrypt 1.2.0 was out before 3 weeks. It was not updated on the thread cause all spots were occupied with old users. More then 15 new features have been added to this brand new update. along with that a new crypting engine has been added to the crypter which is currently giving around 3 weeks average FUD time.

New look on the crypter:

Price:

85\$ + sending fees for 1 month free Updates with 1 Private stub.
115\$ + sending fees for 1 month free Updates with 2 Private stub.
210\$ + sending fees for 3 month free Updates with 1 Private stub.
300\$ + sending fees for 3 month free Updates with 2 Private stub.

Note: I do not visit HF daily, but I am always online on my skype so if you need any help or like to make any purchase or need any updates you can always Contact me on skype.

Effective999 - November 2, 2014, 10:56 am

I have spent hundred of dollar on scam sellers on HF , I have purchased nearly ALL crypter and they are fud for MAX 2 days, considering most seller charge over \$100 for one private stub at only \$85 this is a bargain.

BUY THIS you will not be dissapointed!

very good seller, fast support, always fast on skype - legit and only seller on HF I can recommend!!
Trust me I have tried nearly them all! This one is the best!

Toxic Legend - November 2, 2014, 10:12 pm

Vouch for N3oNight and his BetaCrypt. His Crypter lasts very long because of the private stub he codes per person. Marry Christmas.

N3oNight - December 11, 2014, 2:39 pm

Thanks for the Vouch guys..

everything is sorted out and all the users are updated with the new version.

(Nov 2, 2014 09:20 AM)N3oNight Wrote: [\[CITE\]](#) New Updates,

BetaCrypt 1.2.0 was out before 3 weeks. It was not updated on the thread cause all spots were occupied with old users. More then 15 new features have been added to this brand new update. along with that a new crypting engine has been added to the crypter which is currently giving around 3 weeks average FUD time.

New look on the crypter:

Price:

85\$ + sending fees for 1 month free Updates with 1 Private stub.
115\$ + sending fees for 1 month free Updates with 2 Private stub.
210\$ + sending fees for 3 month free Updates with 1 Private stub.
300\$ + sending fees for 3 month free Updates with 2 Private stub.

Note: I do not visit HF daily, but I am always online on my skype so if you need any help or like to make any purchase or need any updates you can always Contact me on skype.
I will just Quote it here till i dont upload the thread with this info.

I am interested in this crypter.

SIM-1422930 - September 20, 2015, 9:25 am

I have purchased many crypters C++ and C#

the C# is the cheapest in the terms of Quality for money ,C# is powerful thought -I have seen many C# coders who can do stuff the C++ coders can't do with ease like the C# coder do

N3o speficially is very talented ,I have dealt with N3o and many indian coders -N3o crypters give to me the highest FUD time ever

will renew my private subscripton soon :) .

Nice to see you on HF after long time.

BTW I provide real private stubs and its FUD time purely depends on your use ?

My Stub been FUD for around 2 week so far. Product so good i decide to buy another package. If you are looking for truly private stub, this is the best product :) Better than buying cheap crypter with shared stub which have 10s or 100s of user and worry about checking FUD everyday. quality beat quantity.

I really like using this crypter for small-scale spreading(~300 people a week). It does the job well, and I'll be sure to renew my license. The run-time and scan-time detections are decent enough for the price, and you won't find any better run-time detection for the price on HF.

What?

Prove your theory first?

Everybody knows that if an AV detects something it alerts the user or it's not going to detect it and yet you say it almost detects it?

It's either 0 or 1 not .5 mate.

I dont need to prove anything as my buyers know the quality I am providing.

Its you who keep posting on others thread about detection and all.

You should first look into your crypter and test it with 360 AV.

arsenel - November 25, 2015, 4:09 am

I just could try the crypter. First off all it is fud as promised. and by fud i mean 0 detections not some fud! crypters here that says eset can not be bypassed.

I wonder the fud time and will write another comment about it after 1 week. The crypter is easy to use and the owner(coder) is a cool guy that really helps you.

To be honest i have used a lot of crypters here in this forum there were actually 2 crypters that are my favorite but now i think it will change. Normally i always use 2 crypters at the same time to be safe when one of them isnt fud. but for the last months none of those crypters were 0/36 and even if they were fud on scan time i had problems with run time.

If you are in a situation like me i mean really bored of paying crypters and at the time you need it most it can not bypass an av that you really have to you should consider buying this crypter. It may look a bit expensive but you already paying money for nothing atleast this you will know it worths its price.

Gee4rce - November 26, 2015, 6:21 am

Can also vouch for N3oNight as i was a customer of "2012 Crypter" around 2 - 3 years back, and this was one of HF's Top notch crypters for me! Very experienced coder- you guys won't do anything wrong purchasing here :) !!

Cheers, Gee.

Thanks every one on your vouch. Have Just released an small Update to patch some runtime detentions.

Change logs:

- Nod32 Runtime detection removed
- KIS Detection Bypassed with normal startup
- Recoded the stub.
- Removed Hide file & folder option from the crypter as it was run-time detected by AVG and KIS
- Some minor FIX.

nanocore Crypted with compression from the crypter.

arsenel - February 25, 2016, 6:55 am

I can never write enough vouches for this crypter and the owner.

I always use 3-4 crypters together. Incase one gets caught. I was real sick of the crypters claiming they are fud but they dont bypass in the runtime or says it is fud only 1 av detects it.

To be honest fud for me is 0 detections no matter what. It may seem a bit more expensive compared to the others but i assure you that you will get more of what you pay for.

My last crypt longed more than 2 weeks as fud(0 detections) and then only 1 av detected it. The owner is a great guy who helps you very fast. Before people updates their av my stub has already been updated to fud(0 detections) again. So i can enjoy my new 2 weeks of fud time.

The best thing of this crypter is your stub is different. It is like a private crypter for you. So you dont need to lose you fud time cos of some stupid scans on vt site.

A very big vouch for the crypter and even a bigger vouch for the owner

He wants \$104 for his product. It says on the thread it cost \$91.

Also I had to pay him \$15 BTC for him to help me with a problem. Very bad support.

I have a Clear Business, You didnt checked the thread Properly as I clearly said there, "5% to 10% Service fees applicable". You can just calculate yourself and see whats the final amount.

and there is a small fluctuation on BTC Rate on different wallet sites.

You just had my crypter for 6 Days and you were really a Big Pain, as you msg me 3 times on a daily base for very small things.

Also I charged that 15\$ for service cause I know you were a time wast when you said start-up is not working and I clearly said crypter has been running from last 2 years without any issues, so how can start-up not work.

I gave you a reason why I dont want to sell you and let me tell you again : "You are a buyer who spams me every day, and I dont want more spam from you."

I can Get many buyers like you but you will not get a Crypter like BetaCrypt.

Hate to say this but anyone will buy a new crypter if its shit it WILL get exposed just how it goes both of your crypters look great.

Problem is theres a difference between the both of you.

One is private - N3oNight

N3oNight I knew someone that had your crypter and they kept getting a window defenders detection but they told you and you said you would help that. Don't know if you did but what he told me is that it bypassed most of the main AVs and the stub was FUD with only 1 crypt for like 2 weeks then he needed to reencrypt.

The other is public - Wardow

Your USG is insanely strong! I heard your crypter is being updated nonstop but the only AV it can not bypass is AVG BUT you were also fixing that.

Look you BOTH got AMAZING crypters BUT how about you both educate and help each other with the problems be nice you guys are both VERY smart people.

I would like to vouch for the coder and his product.

it's been few days since i purchased the crypter & the stub, on scantime it's still fud, on runtime i've encountered a runtime detection due to my wrong settings, i've contacted N3oNight and in 5 mins he gave me the correct setting, and it's undetectable. It's amazing

For those of you that need a FUD file 24/7 buy this product and not other crypters with public

stubs, i've tried 3 of them and the crypted file was FUD for good 6-7 hours, if you want it FUD for weeks use this.

it's been few days since i purchased the crypter & the stub, on scantime it's still fud, on runtime i've encountered a runtime detection due to my wrong settings, i've contacted N3oNight and in 5 mins he gave me the correct setting, and it's undetectable. It's amazing

For those of you that need a FUD file 24/7 buy this product and not other crypters with public stubs, i've tried 3 of them and the crypted file was FUD for good 6-7 hours, if you want it FUD for weeks use this.

Basically he dont want to do as i say and want me to listen what he says.
he has been using crypter from 10 years but can not clone a File to remove detection 1 or 2 simple detection's, he is using crypter from 12 days and gives me scan link of detection today with 2 detection which can easily be removed by cloning assembly but he is not doing that.

You can see from his rep, He had same issues with Killa , then bull and now I am his next target.

I did everything he asked folks, assembly clone etc. It was still detected. His next move was to send me stupid links that have nothing to do with my stub. It's like me selling clothes and blaming people when it gets ripped due to poor fabric quality. He still refused to take responsibility for his shit product and refused to give me back my money so i'm here to warn people who are thinking of getting this to find their crypter elsewhere. This is the absolute WORST of any crypter i've used on hf. Just think about it for a sec, why should it even need assembly clone to be fud if he's as good as he thinks he is? There are many PUBLIC crypters here that don't need assembly clone and are fud. This is suppose to be a private stub, yet it's still detected even with his stupid assembly clone suggestion. This guy is a below average coder who has no business making crypters, and as time goes on he will be exposed

even more. You are right about one thing though and it's that i have a problem with bad coders like you and killa. My issue with bull was a misunderstanding on his part about my payment to him and it was resolved and i have no problem with him. Killa was a bad seller just like you and just like him, you won't be here much longer after i'm done ruining your reputation. If this site had escrow you wouldn't be so emboldened to false advertise and scam people. You're a hack, plain and simple, and i will continue to warn others everyday until i get my money back or until you're out of here.

For people who have a license of his product and want to test it for themselves, i have the stub he gave me. I will give you my netwire stub to test it for yourself and see if you get a fud result. We'll let the results do the talking. You obviously have very little experience with crypters if you honestly believe this is the worst crypter on HF. You haven't seen shit..

He has Eset. how is that going to end the stub's life? :)Ex: When 20 license are sold, some users need Update after 2 weeks, some needs after 3 weeks and some do not need through out the month,

So from that you can calculate average FUD time.

Also if one or two PC got ESET then it wont really matter instantly.

But you might see detection after a week or 2 from ESET only as its very strong AV.

How good is this crypter with NetWire?

Minun - September 26, 2016, 6:04 am

Damn this crypter is so good, I tried many crypters in my life and even was paying \$30 per daily crypt and this crypter is like the best solution for me. just fucking awesome i got nothing more to say.

VOUCH

I buy this crypt believing it would be FUD (This is what the seller had told me on skype) but testing it on different VM (Windows 7, Windows 8.1, Windows 10) I realized that this was not the case and that I simply threw in the trash \$ 200.

When I explained to the seller that the encryption was not FUD scantime (test nodistribute result 2/35) he replied that it was rather a good result and that I had only to change the icon ... the usual bullshit that has nothing changed evidently.

After several tests RUNTIME here are the results :

NETWIRE:

Avast: Does not bypass

ESET: Does not bypass

Symantec: Does not bypass

AVG: Bypassed

Avira : Bypassed

Kaspersky Total Security : Does not bypass

McAfee: Does not bypass

IM4:

Avast: Does not bypass

ESET: Does not bypass

Symantec: Does not bypass

AVG: Does not bypass

Avira : Bypassed

Kaspersky Total Security : Does not bypass

McAfee: Does not bypass

LL:

Avast: Does not bypass
ESET: Does not bypass
Symantec: Does not bypass
AVG: Does not bypass
Avira : Bypassed
Kaspersky Total Security : Does not bypass
McAfee: Does not bypass

When I simply asked the seller to refund my stub, he reacted very aggressively telling me that it was all my fault that it came from my settings and that he would do nothing for me, then he decided to block my license when I had 11 days of use and I paid \$ 200.

Conclusion: crypter not fud and bad support, and little advice if it makes you the blow of I no longer have to encrypt to sell to tell you 1 days after that is good I can sell you 1 it's just marketing I have been made

It was a bad crypter, though initially when it started out it was good. I got a crack version of this back in 2017 from a friend of mine and was kinda depressed with his .NET code.

Unfortunately a lot of people got caught in 2016-17 and this guy either got scared or made a different account.

Is it still for sale? I am wondering if I can I take a vouch copy? I have a rat needs to be crypted. I will post the scan pics of the crypted file as feedback for your review. Thank you!

Best Crypter to have existed.

N3oNight is a real brother. Preached me into buying BTC back in 2014.

Information:

Are you tired of using Crypters which do not function well? Tired of spending money on Crypters which advertise to have long FUD Time, but they are actually FUD for some hours because of the stub used by them is shared with 400 to 500 users. Well you are at the right place then. BetaCrypt is 100% Custom Coded by the Coder who also coded [SmartMiner](#) (First Ever Runtime FUD Miner), And yes, your guess is correct, that's me. I have been Coding Crypters since 2009. I have put all my knowledge and skills to make this Crypter to give the max FUD Time & Compatibility with almost all Applications.

By keeping all this problems in my mind I started working on a BetaCrypt which will be exclusively limited to 20 Users and each user will have there own Unique Stub. BetaCrypt Is very very simple, yet Very Powerful that it will give a very long FUD Out put for 15 to 20 days, Cause each user will have there own Personal Coded stub that won't be shared with any other User. And also each Created output will be Unique and dynamic that will lead to a Long FUD Time.

Whats make BetaCrypt different from others?BetaCrypt has been coded by a Professional Coder with 8 years of experience in the field

BetaCrypt Can Guaranty to Give a long FUD time of 12 to 25 Days(Approx) from the same stub which no other Crypter on HF does

Custom metamorphic engine technology Mutate Output Code for a Very Long FUD Time

High Compatibility, Works with almost every Software used on HF

Very Advance Persistence & Anti-Botkill features which makes it near to impossible to remove Installed file

High infection rate which will be around 9.2/10

Tested and Works Perfect with Unicode OS like Chinese, German, Korean

Will have a very small stub with a size of 12kb to 20kb(Without Icon)

Each of the 20 users will have there own unique stub which will ensure that your stub/Crypter wont be shared to any one else besides you

Each user will get direct support, instructions and help from me(Coder). As no one know my Code better then me

BetaCrypt has been serving customers for a long period of 2 years without a fail of downtime
