Alert for: Adobe Shockwave Player 12.0.7.148 and earlier users

Vulnerabilities: CVE-2014-0500 and CVE-2014-0501

Update ASP: <http://get.adobe.com/shockwave/>

Information:

Adobe has released a security update to address critical vulnerabilities for Adobe Shockwave Player 12.0.7.148 and earlier versions of the Windows and Mac OS X systems.

The Patch fixes two critical remote code execution vulnerabilities, that could potentially allow an attacker to remotely take control of the affected system.

According to the Security Advisory released by Adobe, the vulnerabilities labeled as CVE-2014-0500 and CVE-2014-0501, and very limited information is available at this moment.

"An attacker can exploit this issue to execute arbitrary code in the context of the user running the affected application. Failed exploit attempts will likely result in denial-of-service conditions."

Windows and Mac OS X users are recommended to update their Adobe Shockwave Player 12.0.7.148 and earlier versions update to the newest version Adobe Shockwave Player 12.0.9.149.

CyberneticTitan - February 13, 2014, 10:36 pm

I have updated. Thanks for the warning! ?

55555online - February 13, 2014, 10:37 pm

Ah, thank you! I've read this article earlier, but forgot to update. Good thing you reminded me.

Automatic Coding - February 13, 2014, 10:39 pm

That's it, I'm done with Adobe.

HTML5 is the future for in-browser, past that, I don't use their software. Just uninstalled flash:-

Been needing a reason for this for awhile, here's the reason.

damier - February 14, 2014, 8:41 am

@Automatic Coding

No flash, no youtube. HOW CAN i LIVE.

Reticulum - February 14, 2014, 11:37 am

Thanks for the warning, I've just updated!

Gustav. - February 14, 2014, 4:47 pm

These things happen every other day, as it seems. From my point of view that is. Lol, but anyways, thanks for the info.

concernedguy - February 14, 2014, 5:50 pm

Doesnt Google Chrome automatically update this?

Aura - February 14, 2014, 5:53 pm

Not always. Most of the time you have to update your plugins/extensions manually.

NinjaTaco - February 15, 2014, 1:54 am

Thank you very much for letting us know of this!

pinokolada123 - February 16, 2014, 5:39 am

My computer very laggy and i getting very much disconnects, I think I found problem, thank you :)
