Thread: [\[Beginners Thread\] Just arrived? Check-in! \[Beginner-to-beginner-help-desk\]](#)

**grgrsn** - February 15, 2014, 10:19 am

Hello everyone!

On a daily average, I think I see +50 different posts in this section, with new members asking favors, questions and what not more.

To get rid of all those posts and threads, I am here making a beginners help desk, for beginners.

I am not any genie, but I do have slight understanding of this subject, meaning that I will not be able to answer all your questions, but I will try my best, and I wish to help you if you need any help.

You may ask me "But, why are you doing this? You have no reputation, nothing at all, not even that many posts or threads"

Here's the answer:

I've been reading a h\*ll of a lot on this subject the past 4 years. I know somewhat more than many of the new users, and wish to help those, who need my help. I've myself not been a very active hacker, since I literally don't have the time.

If you have any questions, or need help to do anything, I'll be your guide. Post on this thread, and I'll check it as soon as I have the time, and answer same wise.

If you have any questions regarding my free service, go ahead and ask as well.

I just wish to give back in regards from what I've had from the forum. Thanks a lot!  
Bumping this thread.

Really want to help out newcomers :-o

Hello Hello please teach me to hack gmail account. Does anyone can? Please help me.

**LoADiE** - March 6, 2023, 1:35 pm

Hello I am still new here and haven't made any friends as of now but I could really use some help. I have someone impersonating a family member in prison and he made a Facebook that he's using to extort money from my close friends family and friends. He has already got some people for a good amount of money and because I'm still a beginner at all this I need some help making a payload and link that I can send him to be able to access his phone ( like camera,messages and any other info) so I can find out who's doing this and stop him or hopefully get the money he has stolen back to the people he stole it from. Any help would be greatly appreciated. I plan on being an active member on this forum and I'm also hoping I can make some new friends and hopefully a mentor to learn from and look up too. This situation will only be available for me to catch him for a little bit so hopefully someone can help. I'll be doing my best to make it happen myself but please any help would be amazing. Thanks.

Also is it possible to change my user name?

I can provide proof of this also so if your interested in helping you can see I'm not messing around.

Lmao sorry didn't realize this was so old. Lol

**godgod\_mrx** - March 6, 2023, 2:04 pm

I tried Man-in-the-middle attacks within my own Network. I tried to pose as the Update server for software on the target machine but it didnt seem to recognize "me". I would appreciate resources on which I could educate myself.

I dont want to hack any instagram accounts or whatever a lot of people want to seemingly do. I am just here for fun.

**?{ RadioActive Hack }?** - March 6, 2023, 3:31 pm

Bois this thread is from 2014 and he hasn't been active since 2017.
