Depend on which botnet you choose , i've different botnets depend on what you want to do with the botnet pm me for a list of the bot available's.

They can hold 5000+ bot's also more if you buy a server.

LMFAO Bulletproof? Get out of here man. It's funny how people refer to bulletproof servers. If your IPs are listed, you are screwed. Once the HAUS has listed your IPs, you will have to get a new server/IP range. Also, the IP ranges in so called bulletproof servers are so used and abused, it's not even funny. And if someone within the same subnet does something bad, the whole /21 can get listed affecting everyone.

Lets think about this, why do you think most successful web hosts don't do "bulletproof servers" because its bad for business. Your server will go down soon, I give it 3 months

You're speaking the truth. "Bulletproof" servers and domains are normally nothing worth for a botnet. Your domain or IP will be blacklisted anyways and if that happens you will lose bots. If you have a bulletproof domain it will stay alive, if not it will be suspended. In both situations you will lose lots of bots. And AV companies maybe blacklist faster than the spamhaus. Maybe the server or domain stays alive but it doesn't matter. Only for DMCA forbidden material it does matter.

Indeed my server providers are not well know and aren't based on Europe or America, they accept this kind of hosting and also they ignore DMCA. I've hosted my server for over 8 months and nothing happened.

Paypal indeed is only accepted by serious user's here on HF those who have high rep and almost no scam report.

I can't access your botnet , I haven't stated there anywhere on the thread . I will setup the botnet and then I won't do anything else. I can setup that botnet if you would like to get that send a PM.

I did not receive any spreading method, and I received very basic monetization methods, etc. My file is not crypted, there was no spreading method involved and there most certainly was not an exploit kit, and the "protect yourself" was basically just "use tor, pay in bitcoin, and don't attach real personal data"

I received a vague guide on how to make money, and no guide on how to spread or even get a single bot. Overall I am just disappointed in the amount I paid for what I received. I wish you were on ever so I could just speak to you personally instead of escalating it to this point.

I've writed to you that spreading method I will give it to you soon (today) with exploit kit , I wasn't able to give you that so I give you today the package otherwise I would have gaven all to you yesterday.

About the crypt I can give you one , but if you see on the thread I haven't writed that I give bots or crypt.

RS-4 - April 29, 2017, 2:49 am

Looks like a good service. How does it go in terms of the hosting - do we need to pay for that on top after you give us access? I'll speak to you on PM actually.

Blatngu® - April 30, 2017, 5:03 am

Soon I will open my bulletproof hosting website so will be more easy to setup etc..

In terms of hosting once you sent me the money for one of the two package I will buy the hosting for the first month then I'll give you login details so you can manage payments for the next month etc..

This isn't the cracked version. Blatngu was authorized by the official developer from Exploit.in to re-sell the panel on HF.

Update: Blatngu is now responding to me on XMPP and says he will be setting up new hosting which will be non DMCA and Spamhaus compliant in hopefully under a week.

Hi Hug33,

- 1) Yes as a total noob you will learn all you need to know, you can read all the reviews of my thread.
- 2) It can works for all crypto-currency that have a pool and that can be mined.
- 3) You will get one free crypt and also I can tell you which crypter is the best to buy.
- 4) Yes in the mentoring package there are several spreading methods which works too right now.
- 5) You won't spend much, depends on which crypter you buy if it's private or not and also the server.

I hope I've answered all of your questions if not send me a PM or add me on jabber ?

Razey - May 5, 2018, 4:28 pm

I am new to this botnet domain and have a few questions before deciding on making a purchase.

- 1) Will i be able to understand your course (mentoring) and really learn from it? (no bullshit)

2) Will it be able to use a "botnet" like a "rat" because my main focus is computer access and taking files.

3) after purchasing your package, What will i need to keep my botnet running (i want a good crypter and hosting)

4) How will you contact me to mentor me and do you have your own discord server?

5) I'm not sure which botnet i want, but my main goal as said above is computer access and stealing files, the ability to ddos (hard hits) and Mining. Any botnet that has those capabilities or around that is what i'm looking for. Can you provide that?

6) if i don't have btc, is there an alternative? (paypal)

Sorry I do only 1 on 1 on Discord or Jabber with no voice chat. But you don't need to worry about this, the mentoring is really easy to follow ?

Nenny - May 9, 2018, 6:18 am

Vouch for op his service is good, the only thing i would improve on is grammar and syntax, besides that the guide is easy to follow and really helpfull if you are just starting off with this. Op offers good support and is willing to answer any questions or concerns you might have after reading the guide, the spreading methods are reliable and if you apply you can expect to get some pretty decent Bots, they are in no way revolutionary but still pretty good. The price is great for the service he offers! Only suggestion i would like to add is to invest some more in explaining about EKs :D Good job ?

Warning: I purchased his service and he sent non-crypted stub file and claimed it was crypted LOL. When I asked him to crypt he made me wait 4 days and then crypted my file with a free crypter. Overall super low quality service, you get about 1 response per day from this guy so you really gotta try your best to get the best response out of him every day. Then he continued to change the botnet info that he setup for me. Don't recommend his service, will be creating a report shortly.

Warning all users.

This user also named as Maxo is a kid, here's why, I'll explain shortly.

I've delivered all the package that he bought for, yes it's true that I've delivered the crypted stub after 3 days because I got problems in IRL but I also told him that in exchange I was able to give him a sort of compensation of 3 free crypts. I didn't used a free crypter you refused me to give the link of the scan result for no reasons and I didn't change anything on your panel someone should have changed them, if you was more like an adult I could too fix that issue. You act like a child, a baby whine so create your report and stay happy.

Also remember not everyone stays 24/24 on a PC. I connect for 1 hour atleast a day on busy days

other wise I'm online 4+ hours.

Hi,

Sure no problem you can add me on discord or jabber for an easier communication if you would like to!

Yes it will be easy because botnet have an GUI (Graphical interface) so they're pretty easy to understand. Also you'll receive my explanation to anything you need to know about botnet that will help you to understand more about this world ?

I am online jabber right now and I am interested in buying your mentoring package.

Cs007 - February 23, 2019, 4:16 am

I have added you on jabber, kindly accept as I need to setup bot for me.

Blatngu® - February 24, 2019, 12:41 am

I will be online on jabber later today

sooterwat3 - February 25, 2019, 10:38 pm

I am ready to buy your mentoring package but still haven't seen you online yet.

Blatngu® - February 26, 2019, 5:56 am

Hey I'm currently online now!

sooterwat3 - February 27, 2019, 1:24 pm

I just missed you by an hour. I will be online everyday anytime after 1-2 pm central time until about 3am.

yes I would like to do it now

When we start talking on jabber then I will send payment. I'm online now and will be on the rest of the day waiting for you.

sooterwat3 - March 1, 2019, 1:58 pm

Hello, please tell me the time and timezone that you will be online on jabber next time you get on. I will make sure that I am on at that time!

twentynineteenandbeyond - March 1, 2019, 2:25 pm
