Thread: [PART2: Teaching 1 person my private method of earning money ~\\$1500+ weekly currently](#)

Anakin™ - February 16, 2014, 1:58 pm

Part 1: <https://hackforums.net/showthread.php?tid=4043274>

Hello everyone.

A few weeks ago I've discovered a method which has huge potential to make some big cash. After a few days of work, I'm up to making minimum \$1500 weekly now, which will increase more and more over time. Most of the income is autopilot by now, and the main earnings come on weekends.

Few short words about the method: I'm not gonna bullshit you and tell you it's autopilot from the start. Well, it's not, you'll have to work for it. The work, although, is very simple and you do not need to have any previous knowledge of anything to do it. A child could even do it. The harder you work, the sooner the method will demand less work and eventually turn into autopilot. I'm quite sure that you'd be able to earn like me if you decide to put in enough of your time. By that, I mean around 2 hours daily. The method needs a minimum investment to start, but I'll cover that for you. The method is 100% Whitehat, legal, moral, etc.

Take your time to answer the questions the best you can, don't forget only one person will be taught this method in this giveaway.

So, let's start, the form (different from part1):

Code [b]1. Age:[/b]

[b]2. Location:[/b]

[b]3. On a scale from 1 to 10, how creative are you:[/b]

[b]4. How much hours/day are you willing to dedicate to this:[/b]

[b]5. Are you a gamer:[/b]

--Answer the following questions only if the answer to 5 is 'yes'--

[b]What do you game on (PC/consoles):[/b]

[b]What games do you play:[/b]

[b]Do you have contact with other gamers (e.g. a gaming clan, youtube channel, active on some gaming forums etc.) (if yes, describe into detail):[/b]

[b]Do you ever watch twitch.tv livestreams: [/b]

[b]6. Why would you like to learn this method: [/b]

[b]7. Write a few words about yourself (max 5 sentences) so I can get to know you better: [/b]The contest will end on February 27, 8PM CET.

Disclaimer:

It might take up to a week until you start earning.

The method will not magically generate money for you.

I will write an e-book about this and you'll be the only one to get it, and for all support and general chat we'll use Skype. I'll also give you lifetime support, and we can share experiences with each other.

The method will never get saturated.

3-day payment as of Feb 7-9.

This weekend's earnings are coming tomorrow as I'm waiting for today's payout.
EDIT: Here they are. The payout on 15th is a 3-day payout.

Good luck!

6. Why would you like to learn this method: I have been into monetizing since late 2009. I joined HackForums to learn about hacking and ratting. While in the process, I was greatly influenced with the marketplace and active members in that section. I was amused after going to bragging rights section and that became my favorite section. Since then, I am on CPA and I have earned a lot but CPA brings less income to the work or efforts I put in so I am in search of methods which would actually make me earn at a fair ration to amount of work put in. And your method sounds just perfect. I am also trying to help my dad with financial support.

7. Write a few words about yourself (max 5 sentences) so I can get to know you better: I am a beginning web developer and gamer. I am an enthusiast of technology and love computer science. I can be friendly and talk to you as a friend, and I can become more professional and mature whenever it is necessary.

My Story ([Click to View](#)) Well, thank you for taking time to read this. Let me tell about my physical self before I get into the situation I am in. I am a white 6'4' male that lives in suburban Oklahoma City. I go to a private college prep school and have average grades (Not enough computer related subjects). I am not a bully to friends, but I am not necessary warm hearted either. I play games and

program in my free time.

Me and my mother (Parents divorced, all I will share for the moment publicly) rented a house for 6 months as we couldn't find a house before we sold our house. We found a house 2 weeks in the rent house and it needed some work. We have little money left and the house still needs a lot of work. My mom has been working overtime with her hurt kneck (Something with her nerves in her shoulders/hand) and her job is courtreporting (She types like 120 words per minute for 2 hours straight with a her kneck, so yeah) and her situation is only getting worse. I want to help, but feel powerless at the same time. My dad is a multi-millionaire and won't shed a penny to her unless it is child support. Now, you see why I want to make money. I am not in the situation where I just want to build a cool PC, this is for more than me.

4. How much hours/day are you willing to dedicate to this: 3.33

5. Are you a gamer: Very much so.

--Answer the following questions only if the answer to 5 is 'yes'--

What do you game on (PC/consoles): I used to be a heavy console player but as of late I have done PC Gaming.

What games do you play: I have played COD, BF, League of Legends, Starcraft, Dayz, Civ franchise, Minecraft, Path of Exile, Hearthstone.

Do you have contact with other gamers (e.g. a gaming clan, youtube channel, active on some gaming forums etc.) (if yes, describe into detail): I used to be highly respected and involved with TTG as well as s7, but since I switched to PC my activity has slumped a bit. I ran my own youtube channel and through that became decent friends with other youtubers, no one of serious note but the ability to establish relationships is there. If you want pre-established gaming outlets I can't offer too much, however I tend to make partnerships quickly and can get access to those outlets at a very rapid rate.

Do you ever watch twitch.tv livestreams: Of course, I watch nearly all games and I can't get enough of the Twitch plays Pokemon thing that is going on now.

6. Why would you like to learn this method: I think the answer to this question is blindingly obvious, to make money. If your question is targeted more towards why I want to make money the quality of living increase and the tension relief that comes with a consistent income is always nice.

7. Write a few words about yourself (max 5 sentences) so I can get to know you better: Well I like long walks on the beach and am looking for a long term relationship, but more to the point, I don't take "no" for an answer and when I do decide to set my mind to something great progress is always achieved. I enjoy conquering the challenges placed before me and will go to the end of the earth in order to solve said challenges. However the most important thing to know about me is that I will be successful no matter the challenge. I enjoy and embrace the struggle more than the conclusion which has shaped me into the rigid and successful person that I am today.

5. Are you a gamer: Yes

--Answer the following questions only if the answer to 5 is 'yes'--

What do you game on (PC/consoles): Yes, I am both, a PS4 and PC gamer. I mainly game on my PS4 though.

6. Why would you like to learn this method: I would like to learn this method simply because I have always been interested in making money off of the internet. I have always been looking for real and legitimate ways to earn money over the internet, but I have had no luck finding one. I have also purchased several e-Books from HackForums, as well as reviewed some for people (I thoroughly read the e-Books I review), but so far, I have not found a legitimate and working method. Learning this method would greatly help me in a lot of things, such as helping me save up for my future life.

7. Write a few words about yourself (max 5 sentences) so I can get to know you better: I am a 15-year-old from Cairo, Egypt. I am a very honest, generous, and loyal person. Hopefully, I will be able to accomplish that goal in the upcoming years. I like socializing with others, listening to dubstep/trance, and gaming.

Additional information: If you wish to know more about me, you are more than welcome to ask me. You could either send me a private message, or add my Skype.

Because of this, there is a lot less money to put towards my personal projects and I currently have no free money for my personal projects. Because of that, I grew up wanting to learn everything about the electronics he was into and that caused me to become proficient in computers and audio-video equipment at a very young age. Also because of my Dad, I have a very strong interest in bicycling, and have two Haro bicycles of which one gets ridden every day. I was introduced to HackForums by my (minorly skid) uncle, and fell in love with the friendly portion of the community. Due to that, I will often host giveaways and contest, and grew to being Ub3r, and in two usergroups in approximately three months.

Thank you for considering me, have a great rest of your day!

method looks great and I'd love to learn it.

7. Write a few words about yourself (max 5 sentences) so I can get to know you better:

I'm a easy to get along with person who loves to game, I work on websites and enjoy coding them, I have a creative mindset often but some times it takes time for me to get the ideas, however when I do get good ideas, they are excellent. Recently I've come up with a tv show idea (and yes I've pitched it to a few friends and they've told me it was excellent) that's a perfect example of how I can be creative with my thoughts.
