I just thought I would let all users know about this and I have not even contacted him directly yet, But this user who claims to be setting up botnets on offshore servers for users has been putting them on onshore servers.

USER ID: [1066842](#)

SALES THREAD: <https://hackforums.net/showthread.php?tid=3718426>

PROOF:

I do not think that a user should be selling botnets and telling people that they are on offshore servers and really hosting them on onshore, Any more proof needed let me know!

Wow, good find! That's messed up that he would lie about that.

Thanks for the alert. There is no excuse he can make. This is just unacceptable..

I think I am going to find out about Tiny Hippo because I am pretty sure its been more than a week and I feel like I just wasted \$40

Wow! would have never thought that.

I hope he gets this resolved soon!

Yeah I would too considering that is really messed up lol, I will wait for him to get on and read this and tell me why he would do this but until then sorry it is staying open.
