Thread: [How To Customize Dual Boot](#)

mony123 - February 17, 2014, 7:17 am

Hello guys,

I recently installed backtrack 5 r3 along windows, but the problem is that annoying black and white appearance of the dual boot between windows and backtrack. So i was wondering if you guys have a way of customizing the dual boot bringing to it more life and colors or themes or stuff like that.

Thnx?

<https://help.ubuntu.com/community/Grub2/Displays>

Google around for "Grub 2 customization" or similar. (Grub2 is the bootloader that you're calling ugly)
