Try making another gmail account (a fake one) and also, make sure you dont just put the username(e.g instead of test123test, put test123test@gmail.com)
(I'm not the creator of the keylogger so im just guessing thats the problem :p)

i try what did you say but it looks like it have some script problem with sending emails i do not know because i was it school so i tried it at school pc where is blocked everythink but i wanted to know administrator password so maybe another monday if he fix that if it is mistake in code, but im going to test it at home so belive guys :D

ach so i tried it at home and it stopped work at begining

But anyway good job :-)

Cloudnine9 - March 2, 2014, 3:06 am

Nice work.

May I ask how you were able to make this send emails?

I programmed a keylogger in C++, but had to use FTP since pretty much every SMTP server requires SSL/TLS.

I would really like the password. Thanks in advance.

BauerIvan - March 4, 2014, 9:34 am

For those who don't want to wait for a fix of the crash under win 7 X86 and X64 systems
Here is an easy solution :)

Just install a virtual machine like Oracle VM VirtualBox, VMware Player/ or VMware Workstation
with your favourite system (win8, Vista) and run/configure the Keylogger from there

StRaXxD - March 5, 2014, 1:09 am

All passwords sent,for the one who didn't get the password it is because they have PM disabled.

o0vash0o - March 5, 2014, 1:20 am

Thank Bro! I will try this when i get home!

Korey18 - March 17, 2014, 5:49 pm

Can you please send me the password. There are alot of reasons why I would like this keylogger. I love experimenting with new programs that could better improve my experience so that I can develop my own work in the future, but I can't do that without first learning from others. I would be really thankful if you inboxed me the password to this potentially great program that you have created. Please don't ignore this post I would really like this :D

Vexane - March 17, 2014, 6:54 pm

Look at all these leeches! Holy crap that's a lot! Almost 50 pages full of them too! I've gotten 20+ PMs for posting on this thread asking for the password.

kev1nop - March 17, 2014, 8:45 pm

PM for password please :) thanks man

Korey18 - March 17, 2014, 9:00 pm

I would honestly like this keylogger so that I could further develop my skills by learning from others such as your self. Hackforums seems like a pretty good place for me to learn the skills needed to become a successful hacker as well as someone who develops their own programs ones that could potentially be released in the future. You allowing me to use this keylogger would benefit me by giving me more experience, knowledge, and inspiration. Unlike most people I plan to use this keylogger for educational purposes such as testing it on myself and friends to better understand it's features and everything it has to offer. I would greatly appreciate it if you allowed to me to use this

unique software so that I can learn off of it and possibly achieve some new insight on how keyloggers work. It's extremely hard to find a keylogger that isn't detected by almost every antivirus software, but it's really night when you do come across a neat keylogger and it's undetectable or nearly undetectable. Would you please send me the password to this keylogger?

akr2010 - March 17, 2014, 9:50 pm

Rachel4eric - March 19, 2014, 3:11 pm

Just wanted to say thanks again this I a definitely useful. I got it working on my windows 7. I was wondering if you could pm me with information on how your methods of deployment. Also if you use all of your own products like how I saw you also have a custom binder or if you use paid programs. I really just want to get better educated and have more success in my activities. But again back to the original post I really like where this is going and would love to see more.

Warhok - March 19, 2014, 5:30 pm

hey brother thnx and o wouldhave pmed you buut i havent made enough posts but neways thnx and no biggie about the wait

so my anti-virus pulled this file up. so, i googled it and this is what i found.

Trojan:Win32/Vundo.gen!D

SummaryTechnical information

Trojan:Win32/Vundo.gen!D is a component of Win32/Vundo - a multiple-component family of programs that deliver 'out of context' pop-up advertisements. They may also download and execute arbitrary files.

Vundo is often distributed as a DLL file and installed on an affected machine as a Browser Helper Object (BHO) without a user's consent. This family uses advanced defensive and stealth techniques to escape detection and to hinder removal.

SIM-478284 - July 19, 2014, 9:55 am

About your Note1 (that the icon changer may corrupt the stub):

I had the same problem on my very first keylogger builder, and the problem apparently was that I was injecting the settings to the stub BEFORE the icon. If that's what you're currently doing, you should do the opposite; first icon, then the settings.

That worked for me. I'm not sure if that's how to fix it in your case though.

twiny - July 19, 2014, 3:02 pm

where we can dl it because i have been removed of mediafire

Root one - October 3, 2014, 10:46 am

I bet with all of these messages, you won't be sending the PW to everyone who posted. I'd want the PW too BTW.

Thanks

Myspeld - October 3, 2014, 11:10 am

I'd love to use it. Someone is stalking my cousin and has brainwashed him into thinking that his parents hate him. It's a long story but I don't really wanna type it. It would be great if I could have the password.
