Excellent method from this user, Laid out properly to help you understand and get you earning big \$\$\$

Method : 7.5/10

The eBook is great to help you on your way to make big \$\$\$, Some parts are known already but his added loads of extras to make you earn huge amounts.

Grammar: 9/10

The grammar was good, I did not find any mistakes, Even if their was a mistake a 5 year old would be able to understand the method and carry on.

Layout: 8/10

The layout was great! He had descriptive text to explain what to do and the process of this eBook. Their is also pictures to make things a lot easier to understand and work with.

Overall 8/10

I will give this a 8/10. This is because I know some parts to the method, but their is a lot of other parts I did not know and when I implement those I will start earning big amounts of cash fast.

Time2Rek - February 26, 2014, 10:34 pm

This method is old, and Saturated. Everyone knows the website he has provided. The method will not work, unless you put work in. The website he has provided as an example is terrible and will not work. Make sure you use your own sites when doing this, and it will be very profitable.

I would give this method a 6/10, only because we have to do work to get it to work :\

Anyways, thats my honest review.

Also, when I get mad, I leak eBooks, If this method was truly like actually terrible, I would have leaked it, but Wopy has done a so/so job, unlike ape degree who uses public methods. This method is semi public only because its hidden somewhere in the forums and I know its been spoken of before. I did say the method was terrible at first, the method isn't terrible, its the exact same method everyone uses, but he portrays it in a different way. Can't really explain it, but I change my rating from a 6 to a 6.5/10 after thinking about it. Just the example he provided for the website/chatroom/whatever you want to call it (IM saying that so people don't figure it out), isn't so great and is truly 100% saturated. I would recommend the price be lowered down to 12.99 and then you will get sales out of your ass. Im vouching for this.

He did buy it, I was talking to him on Skype when he did it. He talks to me every so often because we have stuff in common, he said he buys all ebooks which is true, as he had bought mine a while back.
