Thread: [How to locate hidden webpage in w/c the email can be extract?](#)

cloudz4me - February 19, 2014, 10:01 am

how i can find the hidden webpage so that i can extract members emails of website. most email extractors can only extract if the url link have numbers on it but some websites used username instead numbers.

ex.

<http://pennymatrix.com/?ref=lenard48>

so i'm looking a webpage that's have numbers on it so that i can extract the members emails list...

<http://pennymatrix.com/?ref=123455677898990>

what tool i need to use to find this?

SIM-1241186 - February 19, 2014, 10:26 am

What the fuck are you talking about?
"Hidden webpage"?

I have absolutely no idea what you're trying to ask.

If you're wanting to harvest emails, just get an email crawler or something.

I've also never heard of any online email extracting tool "Only working with links that have numbers".

Who the fuck are you? and why do you feel the need to be an arrogant asshole whilst contributing a completely fucking useless post.

At least I answered OP's question, and made it clear that he has no idea what he's talking about, and therefore others reading will have a hard time deciphering exactly what the problem is.

Don't ask something that's completely what-the-fuck, and expect people not to say "What the

fuck?".

If you're going to be a pompous bitch, at least answer the damn question like I did.
Nobody gives a fuck about you, your sister, or the fact that she has PMS in correlation to a lame attempt at a joke.

Put your LQ shit somewhere else.

Just so this wasn't entirely irrelevant, OP;
I suggest you look into programs such as Atomic Email Hunter. There's cracked versions of it, and it has the capability to crawl entire sites. Racks up quite a bit of emails.

Hey, look at that.
You can still be an asshole, whilst being helpful.
That wasn't so fucking hard, was it?

That wasn't so fucking hard, was it?Thank you for this advise. I'll be sure to apply it everywhere

cloudz4me - February 20, 2014, 5:18 pm

i think you misunderstood me :)

yes your right you can extract emails but its limited on "some members" only that they depends what they found in search engine.

ex:

site:drinkactweb.com

<http://drlaurie.drinkactweb.com/>
<http://rugar8.drinkactweb.com/>
<http://kimterreson.drinkactweb.com/>

(This is i want to know how to get those hidden link with # instead a usernames)

<http://0760629.drinkactweb.com/>
