I am offering my service over here.

I can obtain information about ANY business, person, anything.

If the company or person is in the UK, I can do an extensive search. If you need information, come to me. I have a group of people dedicated to this, along with myself.

Online information - Payment after i've got the info

Real world information - 75% before job, rest afterwards.

Anything else you think i could do, let me know.

PM me

Very interesting. So you would be able to do research into exactly the methods certain people use to make money online?
