Quote:

"It does not involve: "Difficult work".

Hmmm... Yeah, think about that... and oh damn! I smell bs :). When have you earned money without "Difficult work" and then given your method away... ?

This is just my opinion. It might work guys and I will be suprised if it does. :)

JoshAllen - February 24, 2014, 1:55 pm

It does not involve hard work.

The work involved is easy for you but hard for others.

That is as much details I can go into without giving away the method.

I dont entirely understand this. You are talking about some kind of "niche" yet, you haven't explained it at all. I dont tend to be insulting, yet I feel this is a bit of a rip off. It's like making a tutorial how to make money through youtube, and the "secret" tip is to make successful videos.

Sir,

I did buy your eBook why else would I complain about something I dislike. And youtube, was merely a comparison. All I have to say is that I regret buying this eBook - not due to the amount of time, I will need to spend on following through with your "advice" - due to the none existing niche, and stating the obvious.

It's like having a tutorial saying: I have this great idea! There is this thing called the job market. Now, comes the niche - offer a service, which people want to pay for. Tada!

Review

Purchased this eBook a couple days ago.

I have decided to make an unbiased review for buyers to have more of an understanding of what they are buying.

Overall - 9.3/10

This is the main reason I bought the eBook. I wanted a method that WORKED. This eBook is no bullshit. The method in it works 100% and is autopilot. It's a great method because I leave this running in the background while I go do other things. I leave my computer on before going to school, and when I come back, I have made money. This method is never going to get saturated and will be one I use for a very long time. No complaints in this section from me. There are a few spelling mistakes here and there. The format is very nice and easy to follow. The pictures also help a lot to explain. One last final thought, this eBook is great for people just starting out. Anyone can do this and it will help with future experience.

PAYMENT PROOF

Questions:

1- "MAKE MONEY PLAYING CSGO" - I make money by playing in public lobbies, or it's on special servers?

- 2- Does it involve gambling or cracking in any way?
- 3- Do i need any extra investment?

Just purchased this about two hours ago, and pretty impressed with it. Definitely a method that I would never have thought of, but I'm sure others do something similar to the method presented. Nonetheless, this eBook is exactly as stated, and will give you an almost guaranteed chance of earning profit with enough dedication. It requires a bit of skill to complete quickly, but being legit, relatively simple, and straight-forward, this is surely a method that can be used for as long as CS:GO is alive.

At \$5.99, this is a steal! Highly recommend to anyone looking for a legit method to creating an inventory of skins and/or earning some cash. Vouch for Ty; pleasure doing business with you!

I've bought this Ebook. To earn the skins it will need time. A lot of time (depending on how you do this). Because you need people who trust you.

Never saw this method before but its also not the best. But I think its working because the idea is legit. When Im done in trying this out I will write a better review :)

You seem to have the question "Does this method require investments?" listed twice on the FAQ section.

Anyways, I purchased this product earlier today due to the sale. Unfortunately for me, it is a method I have used before personally (not saying its saturated or widely known though).

With that being said, however, I can definitely vouch for the success of this method from my past experiences.

ChnK - June 25, 2017, 4:55 pm

Bought this a while ago and forgot to do a review about it.

The method can be done in two ways, both will grant you profits. One requires interaction and the other one is autopilot.

As stated in the OP, you can earn more investing, but you'll profit on both ways.

Don't expect to get a knife within one week, but if you do it properly and constantly, you'll get whatever you want.

So... to summarise, the method is easy to be done (autopilot if lazy) and will pay itself within two days if done properly so after that, everything is profit. Everything is explained step by step on the file.

JoshAllen - June 26, 2017, 3:53 am

What can I say?

Huge Vouch for Ty! I was given the ebook to take a look and its nothing to regret. I was a bit curious because the method in the ebook is in a niche that is saturated greatly and there a limited methods that i've seen out there to make some income, but I was not disappointed. 1st: I never heard anything about the method itself and its pretty unique. 2nd: The ebook is very detailed and gives you all the steps that you need to follow in order to make some money + awesome tips that help you through the process easily. Something that is great about this method is you can leave it on autopilot and even expand it if you have more venues to do so.

For me its a 10/10 and I appreciate the effort he put into giving all the details needed to successfully use the method to not only gain profits but do it without ease.

Thanks again Ty! Do not hesitate to give this one a shot, you will not be disappointed.

I have received a vouch copy and I'm no way affiliated with this user, this is my HONEST review on SKINSATION -----

Originality. 10/10 Easy to follow ebook, author has taken some effort to make this. Just set it up and its on autopilot! It works while you sleep. -----

Ease of use. 9/10 Requires minimal effort, nothing that can't take you more then an hour. Easy to follow steps with pictures! Includes bonus walkthroughs as well!

Grammar. 10/10 I saw no mistakes in his e-book at all, perfect grammar.

Overall. 9/10 This eBook is no bullshit. The method in it works 100% and is autopilot. It's a great method because I leave this running in the background while I go do other things. Best part is, it works on Autopilot while you sleep! Get the book while its cheap!

I'm not good write, but I will try to write a good review.

The method in this ebook is very simple. You don't need to be super pro in CSGO or have a lot of times. In ebook you will have a very detailed tutorial. Also, if you spend the extra few bucks you will earn money faster. With this method you can earn around 10\$ - 20\$ per day.

In my opinion is worth to spend 6\$. You will make it back in 1 - 2 days.

Ty hit me up and asked if I would like to give a review of this eBook so I decided to try it out. Before I

start I just want to say that I have only played a few hours of CSGO so I am not super familiar with it, nor am I friends with Ty so this will be completely unbiased.

-Originality-

[*****]

I personally have not seen this method before but I am not the most active CSGO player. I am sure some people have figured out and ultimately use this method but this is definitely the first compiled guide on how to do it I have seen.

-Presentation-

[*****]

The PDF itself could be more visually pleasing and presented a little more visually pleasing, however, it displays simple graphics, screenshots and paragraphs of text that easily convey exactly what the method is and how it works.

-Difficulty-

[*****]

The method itself is extremely simple to follow and does not require much effort at all. It also does not require any skill in the game but having skill would make the method more profitable to a degree. All you need is the game, and a little bit of time.

-Overall-

[*****]

While the eBook may not be the most visually pleasing it does explain the method in detail, provides screenshots and graphics, and also has an extremely low chance of being saturated. It might not make you extremely huge amounts of money quickly, but it will give you guaranteed income over time. The fact that it is autopilot adds even more appeal to this method. With a low price of \$5.99 you could easily make your money back before you know it.

I received a Vouch copy, it seems like a great guide tbh, I actually really want CSGO now... but here's my short-review. I can provide more info if needed, but I feel like this covers the jist of it...

I don't play CSGO but I did ask a few questions about it to better understand what I am reviewing. From the looks of it, this is a basic guide to aquire skins in a unique way than others. It provides easy to follow, step by step procedure that really anyone can understand. Honestly, it sorta convinced me to buy the game and pay it off with the money earned it's so easy, and possible to auto-pilote with no investments.

I can't comment on Originality since I havent read any other eBook on CSGO, but the Presentation was really nice and like I said, its very easy to follow.

You did a good job man :)

Got the method and I can guarantee it works. It is quite simple, but does require effort from the user. It's pretty much fail proof, but if you are a lazy bastard I wouldn't recommend buying it! I will certainly use this and grow my inventory with ease!

This method is pretty good for it's price, you will make your money back.

Although this can take time depending on how much you want to make, it's still pretty nice and an easy way to get skins without any investment.

For it's price, I'd give it a solid 8/10.

So what are you saying guaranteed profit for auto pilot? You show \$600 profit but did that take you a few hours? A day? Could mean a few months for all we know. A lot of sales threads are knows for manipulation. Just trying to clearing what kind of money "Auto-Pilot" can put out and does it get capped? Do computer specs play a role? Find it odd such an amazing method would go on sale for \$6 lol

"You buy cheap, you buy twice" - this has yet to be proven wrong.

Good morning,

With this method, you can make \$10-20 a day.

It can't get capped. Conphter specs don't play a role.

The price point is set like this for 2 reasons.

This eBook is 10 pages plus, so I think I can't justify the amount of content for the price.

As well, you're making \$10-20 a day. It's not a huge amount, but it's a nice amount.

No, set up is really fast tbh. The 10 pages is just more indepth details.
Also, images take up a lot of space at times.

If you buy it, let me know!

This is alive and profitable.
You spend like 5 minutes setting up then leave your computer on.
There's nothing stopping you from earning.

so you telling that after I buy your book, spend 5 minutes for setting up, leave computer on and will make \$10-\$20 each and every day ?

So how exactly I am earning, i need to sell something or how ?

Also, which payment method I getting paid?

Correct.

You need to do something after.

You can get paid multiple ways and my book covers that. PP and BTC are very common.

My Review:

I am not obliged in any way to give full score just because I got the ebook so it will be according to my perspective.

If you don't find it good enough for you then even I won't change it.

Background:

I have received the ebook yesterday in the morning and I started implementing the method mentioned in the ebook.

Content: 7/10

I have not seen a such method, it can be due to the fact that I don't buy many ebooks from HF. So if you are new then, you will surely find the method new, helpful and you will see it definitely have potential. It takes work in starting then can be automated but then what gives you money without some work. Yes, you can surely make profit.

Writing: 9/10

Method is written in simple English, I can tell this because even English is my second language then also I can understand it pretty easily. Pictures are included everywhere so a newbie can know what they should be looking at when following method.

Its just it doesn't have FAQ so some newbies can have their common questions answered.

Support: 9/10

Ty is surely amazing in this aspect. He is definitely very helpful in nature. He answer all my questions promptly and patiently.

He is sometimes offline and handling things himself.

Result:

Now this I will keep everyone updated with and I will post my results here. I just got the method yesterday so I am still working on this.

TLDR:

+Simple method

+Justifiable price

+Profit Guaranteed*

-Not 100% automatic*

-Takes Time

Profit Guaranteed*- It will make you profit if you don't bitch out and keep trying. Ask OP for help if you don't understand.

Not 100% automatic* - You will have to do somethings on your own but most of the main work is autopilot.

Will update final score after I post results.

Typically I used to say 10-20 but the worst case situation would be \$5 minimum.

KING - August 9, 2017, 7:19 am

King's Official Review

Overall:
10/10

Originality:

10/10 This method is 100% original and unlike anything I have previously seen on HF Ty uses private information to create this method which is why this method is quite amazing. I have purchased a lot of methods here on HF and nothing has come close to what this is.

Saturation:

5/10 This method to me seems VERY likely to be saturated because of how the method works and also the price. However I am unable to determine the likelihood as the current number of people who know and use this method, as well as how long they've been using it, is unknown.

Saturation risk does not affect the quality of the content

Price:

9/10 The price point in this in my opinion is far under priced if you compare it to the money you will get in return. This is good for everyone else but depending on saturation could determine this to be a bad thing.

Conclusion-Profits/Loss:

100/100

So overall after deciding to setup my old gaming rig and let this run on autopilot (altered slightly) I made a little over \$1,000! What I ended up doing was leaving them almost completely for the month and then took a couple days "cashing out" and you can see what I ended up with below;

Spoiler ([Click to View](#))

Now as you look at the profits I earned please keep in mind I believe I hit a bug somewhere. I can't explain it in detail but I multiplied the method a couple times exactly and when all accounts should have added the same, one did not and had earned insane amounts more somehow and still not sure how since I essentially left it be after setup for the most part. But even without the odd ball, you WILL make your money back easy with this.

Just received my copy of this. This is a completely viable method. I've personally tested this method and made profit doing so. There is an autopilot way to do this as well as a way where you need to put effort in, but if you play the game anyways you shouldn't have an issue with either.

Well imho method is, in theory, smart but super incosistent. Oh also, if you plan on getting it fully autopilot, as the thread claims you surely can, you're probably gonna get \$2 in around 3 weeks so good luck with that.

Edit: if you have a lot of spare time and plan on getting work done on it, it MAY (and should) work. Yet, claiming it to work effectively in autopilot is misdirectioning to say the least

Purchased, Waiting for it to be sent!

After receiving this, I just want to give a quick review. The method probably was better in the past when servers existed for this or were new. Results will vary extremely based on how much time you put into this. Don't think its really autopilot.

I have purchased a copy for Skinsation and I have no relations or affiliated between me and OP/Author

Grammar - [10/10]: I didn't notice any errors. Easy to read.

Originality - [9/10]: Honestly I have not seen this method around yet. It is pretty original.

Ease of use - [6/10]: Here is where the title is a little misleading imo. It is possible to do part of this method on autopilot but I honestly don't believe it will can be done consistently and will be very slow. Doing the hands on approach is a bit faster but don't expect to pull in \$100 a day with this. Profiting off the method requires work and communicating with random people. Period. Only about half of the method is autopilot.

Overall - [8/10]: This method is relatively simple and semi autopilot. Not what I was expecting from the title. It is the embodiment of an HF ebook. Some people will definitely find this attractive if they are looking for a slow semi auto-pilot cash flow. But it is not for me.
