Thread: [spreading,Spreading f*cking Spreading](#)

BennysWorldofLiquor - February 21, 2014, 12:02 pm

Hello,

Im searching for a good method on how to spread my bot.

Recognizing, that the most members on HF are 13 and dont know shit about anything, my decision is to make this thread for Helping me and maybe others who are interested in this.

Ive searched all HF and I only found outdated shit from 09-11 or something stupid like Youtube,Torrent. You may ask, WHY STUPID?

Well, I tell you why.

YouTube:

By stealing a Video from another guy and infecting for example a Gamecrack is clever I admit. BUT, your video will be ignored even if you buy Views/Likes/Comments.Because there is another with the same Video that has more Legit views/likes as you. So you can make 50 Slaves with this if you are lucky. But 50 Slaves is worse as nothing.

Torrent:

Most of the main public Torrentpages like TPB,Kickass a.s.o check the uploaded content before to share it with others. In most cases you will get banned before you even get a chance to spread your bot.

So for the love in christ. Does anybody know a decent way on how to spread?
I dont want to make millions of bots a week, but it should be at least 100.

Thanks.

Boredx - February 21, 2014, 12:05 pm

EP + traffic.

coding an EK.

SJDB

Mr. RawrGasm - February 21, 2014, 12:06 pm

The trick to spreading is to find your own way, use your brain and you can find a way to get the most potential slaves.

DemoniK95 - February 21, 2014, 12:06 pm

I am in the same situation mate.. I made my botnet 1 week ago. For the first time is working correctly.But i can't spread it.. I know that you can't hide the rat from antivirus programs but still they are so many without any programs so .. how can i reach them? :/

I currently have 15-20 bots(average online bots 3-8) made them in 1 week via PirateBay (3-4 Torrents which didn't last for more than 20 hours..)

BennysWorldofLiquor - February 21, 2014, 12:12 pm

@Boredx

Yes, an EP would be the best choice, but I don't speak Russian and Blackhole is outdated too. Programming it on my own..hmm I think this is a number too big for my c++ knowledge.

Any good tutorials?

Boredx - February 21, 2014, 12:16 pm

Lurk more. Get source. learn from them. Being doing this 6 hours a day for 4 days in a row, it helps (ps : C > C++) -- don't expect money without sleeping like a charm.

Oh, and btw, if you can earn money from anything else, do it then rent exploit pack.

sweet orange ? how's that thing today ? Neutrino seems the new trends.

(oh and learning russian is on my to do list aswell, since i'm going to work in IT.)

BennysWorldofLiquor - February 21, 2014, 12:41 pm

So there you have the answer gentleman. WORK.

If you WORK in a company or Work for your Botnet its still Work.

?ain - February 21, 2014, 3:18 pm

Nah. YT and torrents are golden. It takes time, and the right tools. I can get almost 3k/month from those two, and they will progressively get you more and more. And you can repeat it to get more. Also try sites like Metacafe and stuff too. There are a few tricks, and those give you the best results. Also Garena is good, and some P2P programs.

Also, I've been trying this new mass posting thing on a site, and Pastebin spamming. Utilizing Facebook and Twitter. File exploits.

Sasha Grey - February 21, 2014, 3:40 pm

I saw this method that you get a .doc exploit with your bin inside. Go to a debate website and send that .doc out saying its a a review on your debate or its a written copy of the latest debate.

BritneySpearzzzz - February 21, 2014, 4:07 pm

You may think pedophiles are wrong in the world, but in these particular cases, their stupidity and idiocy can come in quite handy. Very good to at least use it to your advantage.

What I would suggest you do, is go on to a big 'TEEN' chat with loads of people, pedophiles are all over there trust me. Go ahead and advertise there and be like; "TEEN 17 UK HORNY SEE MY PIC >>> [URL]" - there you go.

Though, I would advise you to replace the icon of your bot to something like windows image and fax viewer default or something, and also switch the file extension to like .png or .jpeg. I know there are

many idiots out there, but at times you won't seize to come pass the pedo who has just a few extra brain cells than the rest.

Good luck!

BennysWorldofLiquor - February 22, 2014, 6:56 am

btw for this people I dont have bad conscience and I will be totally happy to fuck them. haha I think im going to try this out

contractor - February 25, 2014, 11:15 am

Im in the same situation. Need a good spreader or traffic. I have a EK, but my traffic so too low. Need to increase it, and it's the most problem. If anyone could help with traffic, we could JV.

BennysWorldofLiquor - February 25, 2014, 1:02 pm

One you have an EK (hard part). You can buy easily traffic. I recommend too use the searchfunction :-)

You speak from your experience? Or just from your thoughts? I tried all traffic providers here on HF except CyberCore, because he don't answer nor in his thread nor in PM.

If you have any good examples - please provide 'em to me. I'll appreciate it.

danielle00 - February 25, 2014, 2:17 pm

I agree with Britney, the best way to spread it for begginers is probably just by telling people to download a 'follower generator' and copy and paste to everyone..

Another method is to get a fit friend and sit her in front of a webcam on omegle and wait for pedophiles to message you and ask for pictures, once they bite the hook and open the link the rat would have melted into their system infecting them for life.. good luck

Omegle is a shit method bro.

You will only get porn addicted americans

For some reason atleast 20% of the americans are porn addicted not a single european slave porn addicted

#BORNE - February 25, 2014, 2:27 pm

Be smart when spreading, make your server FUD, bind it to a file that is maybe most searched on the top torrent websites.

When spoken of omegle, don't try chatroulette. I even get banned for showing a porn video there on my webcam, got great reactions from old people thinking I was banging a girl in the room ?

Ontopic: goodluck with sharing OP. Maybe try skid forums, they might have cool accounts on some cool sites?

Note: I never infected anyone, except shitty vb.net jokes. So don't flame on me for "supporting" forum infecting. I just thought it would actually work.

Don't do it here though. And don't mention any forum names or links on here.

danielle00 - February 25, 2014, 3:21 pm

Services on this forum offer 5000 slaves for about 200 usd, if u can't find ur own method use that... you will make money back from ddosing

?ain - April 6, 2014, 8:31 pm

Sjdbbs are useless. Very outdated. Drive bys + traffic work wonders. Email spamming. Torrents. YouTube. Spamming, spamming, spamming.

I do lessons, look at my sig for more info :)

papee - April 7, 2014, 1:05 am

I am very newbish.

R35????? - April 8, 2014, 4:48 am

Infect a gameserver. You'll get 500+ daily on a popular one.

vaaruwzki - April 8, 2014, 5:24 am

For target spreading, use private PDF exploits. They go for 450\$ per bin when you have the right contact..

Darc - April 8, 2014, 4:03 pm

As Mr. RawrGasm stated you need to find your own method. Most public methods are saturated and over used. If you can find your own method I guarantee it will eventually click and you will be very successful. It might take some work but stick with it.
