## Goodies' Official Hacking Tutorial Compilation Thread

Hello everyone! Over the few years on HF, I've written quite the collection of tutorials. The following list is not a summation of all of my tutorials, but only the few that I deem important. Many of them are fairly esoteric, but with practice and determination, they can be followed and understood by anyone. I don't claim that these are incredibly advanced; that's not what I'm about. However, if you plan to expand your skill level, I suggest you view these tutorials. If you have any questions, feel free to post on the respective thread or PM me directly. Thank you.

Note: Many of these threads have taken me upwards of 5 hours (each) to write. I'd appreciate any posts/s of my threads to increase recognition.

**FuryBase** - February 24, 2014, 12:48 pm

any chance you can help me with some Ntp attacks? i got the booter i just cant get it working properly, i use divinitystresser. i need to know which port on a ip to attack for slowing the victim with maximal effect.

**#BORNE** - February 24, 2014, 1:10 pm

Very nice clean and simple thread, thanks for sharing OP.

**T0ucaNSaM** - February 24, 2014, 8:06 pm

Thanks for this Goodies you always take the time to do great things for us users to become proficient. If there is anything i can do let me know.

Keep it up man!!! Bookmarked this bad boy.

**ASLR** - February 24, 2014, 8:07 pm

I will be sure to check these out later. Always good stuff from you :)

**ByteOrGetBit** - February 26, 2014, 6:20 pm

Thanks for this man, I'll have a look. I'm an avid local machine programmer and I've been reading up on the OSI Model to start better understanding network programming as a whole. This might give me what I need. Your hard work and time is much appreciated :)

**iDuL** - February 26, 2014, 7:14 pm

You definitely deserve some sort of recognition for your hard work.

**Vexane** - February 27, 2014, 3:53 pm

Pentesting is a legitimate profession; one that I, personally, am going into. It's usually referred to as security consulting, but it's essentially the same thing.

**Kangaroo??** - June 5, 2014, 10:48 pm

Really impressed very high quality :)

**Goodies** - July 30, 2016, 9:15 am

This thread has over 16,000 views. That's pretty impressive.

I know many of these are fairly old, but the majority of them still have some relevance, even by today's standards.

I wish I had the time.

And obvious multi is obvious....

**ZeroCoolAZ** - August 3, 2016, 2:14 pm

Great compilation here. Already been through two of the tutorials so far, and they are superiorly useful.

Many thanks.

**Chief Mark** - August 4, 2016, 1:14 pm

I want to get started but I dont know where. I'd like to keep it simple. Where should I start or is this all advanced.

**Kali\_GFX** - September 16, 2016, 4:38 am

Hello everyone! Over the few years on HF, I've written quite the collection of tutorials. The following list is not a summation of all of my tutorials, but only the few that I deem important. Many of them are fairly esoteric, but with practice and determination, they can be followed and understood by anyone. I don't claim that these are incredibly advanced; that's not what I'm about. However, if you plan to expand your skill level, I suggest you view these tutorials. If you have any questions, feel free to post on the respective thread or PM me directly. Thank you.

Note: Many of these threads have taken me upwards of 5 hours (each) to write. I'd appreciate any posts/s of my threads to increase recognition.

Networking:[Tutorial] ~ Intro to Packet Fingerprinting with Wireshark ~ Detecting NMap Scans![Tutorial] ~ Detecting Network Attacks (Wireshark Packet Analysis)[Tutorial] ~ DNS Rebinding ~ Hacking Routers and Taking Names[Tutorial] ~ Man in the Middle Attack via DHCP Exhaustion on Windows Server 2012 R2

Pentesting:[Tutorial] ~ The Main Points of my Penetration Testing Methodology [Tutorial] ~ Simple Pentest Overview ~ Start to Finish + Post Exploitation[Tutorial] ~ Man in the Middle Attack ~ DHCP Starvation Part 1/2[Tutorial] ~ Man in the Middle Attack ~ DHCP Starvation Part 2/2

Post Exploitation Series:[Tutorial] ~ Post Exploitation Part I: Privilege Escalation (Exploit!) ~ No Admin!!![Tutorial] ~ Post Exploitation Part II: System Information Gathering

Linux Shared Library Attacks:[Tutorial] ~ The Basics of Linux Shared Library Attacks & Function Hooks[Tutorial] ~ Linux Shared Library Bypass /etc/passwd Backdoor Attack

System Exploitation and Shellcoding:[Tutorial] ~ Writing /bin/sh Linux Shellcode for Local BOF Attack[Tutorial] ~ Encoding Strings Polymorphic /bin/sh Local BOF Shellcode[Tutorial] ~ Writing TCP Bind Shell in Linux ASM (for BOF)[Tutorial] ~ Buffer Overflow with ASLR ~ Brute Forcing (Beginner)[Tutorial] ~ Buffer Overflow with ASLR ~ Ret2Reg - Reliable Exploits[Tutorial] ~ Writing Custom ASCII Shellcode (Part I)[Tutorial] ~ Writing Custom ASCII Shellcode (Part II) (Unfinished)

I have a question. Can you please PM me?

momoclo - January 26, 2019, 3:28 pm

Thanks for the information.

very nice keep it up
