Thread: [OS to use learn and install \(hack/Safety\)](#)

yasje - February 23, 2014, 4:57 am

Hello all,

I am busy to install some unix/linux debians etc...

i wanted to make a list to install some os for hack and safety:

Black ubuntu

Kali linux

Xubuntu

Debian

If people know some more os that are good for use tell me!

Cheers! ?

Hi, Linux is better than Windows but when you try a rat ore something, you should use Windows on a VM.

The most people on the Net use an Windows-PC.

But for your question:

BlackArch Linux

CAINE 5.0 Blackhole

Pentoo

yasje - February 23, 2014, 5:29 am

Thankyou for the reply i gonna try it!

And yes for ratting etc... i use win 8.1 pro on vm :P

What do you mean by "making a list of OS to hack and safety" ? An OS doesn't make the hacker you know.
