Thread: [Is there a way to make firefox automatically delete it's history](#)

nickchan - February 23, 2014, 12:22 pm

Hey guys I wanted to know if there was a way to make firefox automatically deletes it's browser history

Or what I'm looking for is for it to be able to automatically put itself in "private" mode.

Any suggestions/help would be greatly appreciated

badvibes - February 23, 2014, 12:25 pm

just go into 'new private window' mode and it's anonymous n shit. it's not that hard to hit it every time you start it up ._o

I know about that but I want to know if there is a way where it will always boot into that mode

Where is the Tools optionsoops, sorry, i'm using an older version. check options, then go under the 'privacy' tab. then you'll see the options i stated above.

edit: check what the guy above me did, just copy those settings.

You should be aware of super-cookies. They are stored through Flash and other plug-ins itself. Private browsing does not protect you from that. There are tools that allow automatic removal of such cookies upon exit. Check out add-on called "BetterPrivacy".

Click setting/option>privacy>tick box clear history when firefox close>open setting and tick box browsing and download history, form and search history.
