JackChitt - February 25, 2014, 1:46 pm

I am interested in seeing members rigs. Please post what you have built or customized here. Specs are welcome. If you don't know much about image hosting, ImageShack has a drag and drop feature and forum tags built in. Choose med for image size.

Here is some pictures and specifications of my last build. I built it a little over 2 years ago.

[\[IMG\]http://imgizer.imageshack.us/v2/640x480q90/59/kke2.jpg](http://imgizer.imageshack.us/v2/640x480q90/59/kke2.jpg)[\[/IMG\]](#)

[\[IMG\]http://imgizer.imageshack.us/v2/640x480q90/23/zure.jpg](http://imgizer.imageshack.us/v2/640x480q90/23/zure.jpg)[\[/IMG\]](#)

[\[IMG\]http://imgizer.imageshack.us/v2/640x480q90/801/k3xk.jpg](http://imgizer.imageshack.us/v2/640x480q90/801/k3xk.jpg)[\[/IMG\]](#)

Here is a bonus screen shot of my desktop. To show some software installed!

[\[IMG\]http://imgizer.imageshack.us/v2/640x480q90/849/nqkf.png](http://imgizer.imageshack.us/v2/640x480q90/849/nqkf.png)[\[/IMG\]](#)

Specs are:

Processor: Amd Phenom 2 1090T 6x @ 4.2Ghz stable overclocked

Motherboard: Asus Crosshair 4 formula

Graphics Cards: X2 Asus Matrix 5870 2gb

Ram: Corsair Dominator ddr3 4X4gb 16gb total @ 2000mhz overclocked

Power Supply: Cooler Master Silent Pro M2 1500watt

Case: Cooler Master 932 special edition case w/ full side window

OS: Windows 7 Ultimate 64bit

Drives: Intel SSD 520 Series 480gb for OS and X3 Western Digital Caviar Black 2tb for storage

Full custom loop: Processor and motherboard blocks, front pump and reservoir, and 240 aluminum radiator in the top with push pull fan configuration. I can't remember the brand names of my loop's components.

Hipster Ariel - February 25, 2014, 1:57 pm

I'll update with some pictures later.

MOTHERBOARD: SABERTOOTH Z77 SOCKET 1155

RAM: DDR3 16GB 1600MHZ HYPERX BLU

HDD: SATA3 1TB 3.5" 7200 RPM

GPU: GEFORCE GTX660 2GB PCI EXPRESS

DVD: DVD RW 24X SATA 24X SH-224BB OEM

Power Supply: 725W EXTREME 2 RS-725-PCAR

Case: HAF 922 Black

Processor: I7 3770 3.40GHZ SOCKET 1155

OS: Windows 7 Ultimate 64bit

I have the VN247H-P and it's pretty nice, the only real complaint I have is that there is backlight bleeding on the bottom of the screen. You won't notice it while gaming, but if the screen is dark you can. Not sure if the 248H has the same issue, but I would read reviews.

The armrest isn't that big, the mouse drops like 10 times a day.

Yep it is the living room, all dark Oak interior.

JackChitt - February 26, 2014, 5:21 pm

This is what happens when you have way too much free time.. HP/Compaq water cooled

Frankenstein. lol Guess I thought that dual core could run a little cooler..

Sickleflows are only good as case fans. They have horrible static pressure and produce turbulence when pulling/pushing air through anything, which causes them to be noisy. (I had them)

I have 5 in my rig and it's super quiet. 4 in push pull config on my radiator and 1 for the back exhaust..

(Mar 2, 2014 03:55 PM)Metalocalypse Wrote: [\[CITE\]](#) Mother of unbalanced builds Batman.
well, i could use a couple more GPU's.

But since i bought everything including the 7970 & 120hz monitor for 1000euro.

I bought them used since i was going to upgrade to 3930k anyway, and with this deal i got lots more to play with.

Going to switch to my old case since this is way to loud for its crappy cooling performance(38 idle).

The 670 is from my previous computer,not sure which one to use tho. Pretty much the same performance.

But ye, both the CPU n PSU is overkill at the moment and it will be dealt with later.

Perhaps if i OC it, but that's out of question right now until i've dealt with the heat issues.

And im not trying to start a fanboy war here, but i believe the 670 is somewhat stronger in games. i haven't done any tests myself due to lack of time, but according to benchmarks the 670 scores a higher FPS most of the time. Now i cant say i've dug very far in this and check for the absolute latest reviews with current drivers and what not.

Heres an example:

<http://gpuboss.com/gpus/ASUS-Radeon-HD-7970-DirectCU-II-TOP-vs-ASUS-GeForce-GTX-670>

First off that example says that the 7970 is better. Secondly that website is one of the worst for comparison.

Thirdly <http://www.anandtech.com/bench/product/618?vs=598>

Forth mantle.

Fifth the higher vram will help you considerably.

Silent Militant - *March 5, 2014, 6:51 pm*

Still upgrading my Case. Adding a Temp/Fan Controller Monitor on it.
