Thread: [\[Challenge\] SQL Injection challenge #3\[/Challenge\]](#)

-zERaIT - February 26, 2014, 5:48 am

Hi guys,

I just made a new challenge, hope you guys want to participate.

Target:

Quote:hxxp://wetlands.sanbi.org/gumboot_article.php?id=185

*NOTE: Replace "xx" with "tt", remove "[]".

Tasks:

- Display version.
- Display Database name.
- Display User name.
- Display your own name.
- Display tables and number them.
- Display everything in color.

Proof:

Spoiler [\(Click to View\)](#)

Rules:

- Use Union Based SQLI.
- Post picture of proof and send me your syntax.
- Don't share any part of the challenge until it's closed.

Solvers:

Spoiler [\(Click to View\)](#)

- Tamaki Suou
- ajkaro
- Lame
- Renegade18
- t.pro
- m4rk0n
- UnChallengeD
- Blackhawk.
- r0ml4h
- z3r0c0000l

Goodluck!?

Impress. - February 26, 2014, 6:09 am

Thanks for the challenge?

??

Azrael Walken - March 15, 2014, 5:36 am

Thanks for the challenge.

But can't send a pm and I don't know how to print numbers with the tables.?

[img]http://www.anonmgur.com/up/73ae097ecbf5f3d4d8dce9f33ae9046b.jpg[/img]

best regards

AW

Lights Outt - March 15, 2014, 2:18 pm

Thanks for the challenge mate :) !

PROOF :

PS: Check your inbox for my syntax

WACKO - March 15, 2014, 5:24 pm

Thanks for the challenge.

SIM-1538688 - March 15, 2014, 6:15 pm

I've gotten so far that version of mysql, databasename, tablename, I also managed to access the names of the columns in the user table though I don't know if I need to do more...

I have pictures of everything I wrote but I don't know what to do now, how do I go about displaying all of the above at once as well as my username? Do I abuse the fact that I can put html, css in the error msg sql gives me?

Edit: this is my first attempt at trying SQLI so I'm still derping about, help?

oiteenera - April 4, 2014, 8:55 am

Thanks for the challenge mate :)

???

Throseph Stalin - April 4, 2014, 5:16 pm

[img]http://anonmgur.com/up/2722fbaced406e20e9f7d4e7c05a2c3c.PNG[/img]

Thanks for the challenge!

Can't PM for another 10 posts or so, but I promise I actually solved it

Championship Riven - April 4, 2014, 9:47 pm

Idk how to make it like yours guys but here's mine

dr.wine - April 6, 2014, 2:10 pm

thx bro :D

Spoiler ([Click to View](#))

Curiosity - October 28, 2014, 7:11 am

Hmm.. how do you actually number the tables? Do you have to do this manual like for example 1. users becomes 0x312e207573657273 and so forth or is there a quicker way to do this?

Got all the other parts which are kinda easy.

MisterDB - October 28, 2014, 7:32 am

I'm wondering about the same thing as Curiosity. How do you number the tables?

Also I'm wondering about how to give color to the tables, would be appreciated if anyone could explain it! :)

totsuke974 - October 28, 2014, 11:34 am

(Oct 28, 2014 07:32 AM)MisterDB Wrote: ([CITE](#)) I'm wondering about the same thing as Curiosity. How do you number the tables?

Also I'm wondering about how to give color to the tables, would be appreciated if anyone could explain it! :) I used, as simple as it is:

PHP Code

```
<?php
```

```
<p style='color:red'> TABLE </p>
```

To change color ;) And for numbers..

Hint : [There](#)

I did it ;) If somebody wants help, pm me or reply :)

[img]http://img15.hostingpics.net/pics/660513Did.png[/img]

Edit: I can't pm sorry so add in skype : totsuke974

apocalypdus - October 29, 2014, 3:03 pm

Can anyone make a TuT how you do that?

totsuke974 - October 29, 2014, 3:18 pm

I can help you but make a tutorial no, actually I can but I will not because you're supposed to have the minimum requirement to do it (How Sql injection works, How to perform it) So in this example, all that I can do is to help you. So add Skype: totsuke974 if you want help. But you'll have to search hardly.

No pain, No gain ;)

If you don't know anything about it, search for sql injection on google.

Hint : [There](#)

Sorry for my English, I'm french ?

Totsuke974 ?
