Hello! Releasing my next spreading web-page! I have tweaked of the code, and added a simple Configuration File, so it's easier for you guys to use it.. =]

Spoiler [\(Click to View\)](#)

[IMG]<http://s9.postimg.org/m5jvz27m7/demo.png>[/IMG]

Post & PM me for the Download link..

Set-Up:

Just copy the files on your hosting, edit the Configuration File, and the page should be fine.

To access your Visitor logs, use the following address: [yourdomain.com/log-visits](#)

You may also want to change the Image in the Tablet Frame. Image location is:

"img/slider/slide1.png".

Configuration:

Configuration File is located in "system/config.php". Open the file, and edit the parameters as you like:

Code // This is the Page Title, which you will see at your Browser's Tab..

```
$_CONF['page-title'] = 'Game v7 Official Release';
```

// This is your download link, which will be prompted..

```
$_CONF['download-link'] = "";
```

// This is the Date for the Countdown..

```
$_CONF['countdown-day'] = '28';
```

```
$_CONF['countdown-month'] = 'feb';
```

```
$_CONF['countdown-year'] = '2014';
```

```
$_CONF['countdown-time'] = '12:00:00';
```

// Enable\Disable Visitor Logging..

```
$_CONF['log-visits'] = 1;
```

I hope you found this Useful! If you got some spare on Paypal ([tupac247@inbox.lv](#)), feel free to donate me some, to help me keep the updates comming.. =]

First of all, it is not called "blabla" spreading. Second, I have never told you need to open "loader.html", I dont know why you try to do it. To test it just open the link where you have the web-sites files uploaded. That's it.

New Link sent.
