How to setup a Booter API with simple steps

Step 1: wget <https://dl.dropboxusercontent.com/u/66711942/Installer>

Step 2: Run 2 commands below

```
chmod +x Installer  
./Installer
```

Step 3: Enter this key: Kronorspringsonboot

and to add API key's do this command

```
./Installer -a
```

You'll find files here: cd /etc/api

Step 4: Add to booter using this format

```
http://ServerIPHere/api/send.php?key=yourkey&ip=[host]&port=[port]&time=[time]&method=[method  
]
```

*All Credit Goes to respected owner of Installer file

optimus2112 - March 7, 2014, 3:25 am

Nice thread,thanks for sharing. :D

I Aspire - March 10, 2014, 3:32 pm

Thanks man very solid TUT will def try

Private666 - March 10, 2014, 11:28 pm

I'm glad i could be of an assistance with this tutorial.

Mr. Furioz - April 8, 2014, 9:16 am

i get this error

```
-bash: ./Installer: /lib64/ld-linux-x86-64.so.2: bad ELF interpreter: No such file or directory
```

i've installed GLIBC correctly and everything. anybody that can help me?

Zero™ - April 8, 2014, 9:19 am

good share but for the noobs you could just use missiontech api manager works the same.

ThealeMW - April 8, 2014, 9:22 am

Pretty sure that means that your not running the correct version for the packages included in the installer script (havent looked at the file) ?

Make sure your using Centos 6 and you's won't get (Bad Interpreter)

batsauto - April 15, 2014, 9:05 pm

Looks interesting I'll have to test it on one of my dedis/VPSSs

Private666 - April 16, 2014, 1:31 am

Just shoot me a pm if you need any help.

?Sephrot™ - April 27, 2015, 3:59 pm

Nice thread, thanks for share!

Dertot360 - August 24, 2015, 9:36 pm

Everything works fine but When it gets to entering the key, i paste in "Kronorspringsonboo" and it says "Access Denied. Expired or Invalid Key." Please update the key thank you very much :)

Hicupish - November 2, 2015, 4:25 am

The key doesn't work anymore, it shows as access denied.
Could you please fix this? :)

hack_man_187 - November 26, 2015, 5:46 am

is the key working at all ?
