Thread: [slaves dont reconnect?](#)

?ash - February 27, 2014, 3:14 am

I'm using cythosia http and each time someone downloads and runs my file they connect and once they turn off their computer they never reconnect. The botnet I'm using has startup support and my file is fully fud.

Any ideas?

Nipsey - February 27, 2014, 3:16 am

It could possibly be your start up file name , make sure it's something .exe .

Also , the crypter you are using may disable the start up. Use no start up on the bot and start up on the crypter.

(Feb 27, 2014 04:15 AM)Yani Wrote: [\[CITE\]](#) Are you using a crypter? Normally when using cryters you should disable the startup function from the server and use the one included with the crypter instead.

Yea I am I using a cypter.i can't remember what I did when I crypter but I'll try again.

Disable the startup on your crypter, also in your botnet settings.

I'm not sure that this will work.. disable start up from the crypter and the botnet will surely mean that it won't start up at all... Probably not the result the OP is looking for.

Private666 - February 28, 2014, 6:45 pm

Disable start-up as the bot may already have it built in.

Zher0 - February 28, 2014, 6:51 pm

I suggest setting up a VMware and testing the startup etc. in that.

?ash - February 28, 2014, 7:01 pm

I'm changing my botnet just bought plasmahttp.

Cythosia is garbage haha
