This is very useful if you are e-whoring while in a conversation with friends.

This will allow you to have 2 skypes open at any one time, so you can use 2 accounts.

If you are on a 32-Bit windows PC, simply do this:

Click start

Search "run" and press enter

Enter this code and press enter

Code "C:\Program Files\Skype\Phone\Skype.exe" /secondary Done!

If you are on a 64-Bit windows PC, simply do this:

Click start

Search "run" and press enter

Enter this code and press enter

Code "C:\Program Files (x86)\Skype\Phone\Skype.exe" /secondary Done!

And that's it, you should have 2 skype windows open now :)

OP i love you, i was litrally thinking of this whilst i was writing my math exam today haha,

Thanks, Vouch for axis. Not the first time that this user has swept me off my feet with a helpful tut.

Thanks, Vouch for axis. Not the first time that this user has swept me off my feet with a helpful tut. loool, wtf

Why would you be thinking about this in your maths exam XD

Roytoy - February 27, 2014, 12:00 pm

Just used this and it worked, inspired by me. ?

But seriously, thanks a million each to their own :P

Glad it helped.

Decompiler - February 28, 2014, 8:44 am

Ive been using this for ages have 5 skype accounts open currently :D
But nice share for users who dont know.

Thanks man, will try this one out. Keep up the good work

cryptoman - March 2, 2014, 12:19 pm

Just used this and it worked..Thanks man!

Matteg1234 - March 2, 2014, 6:26 pm

Thanks, I really appreciate it and am sure that more people than I do! :D
