Thread: [Timelapse - My first](#)

commandzombie - February 28, 2014, 3:33 pm

Hello! :)

Just got a new camera stand for my Samsung Note 3, and did a timelapse outside of my home!
I'm not sure how long I left it there, somewhere like 2-3 hours.

You can see a airplane in the sky, look from 0:23!
What do you think?

Also ordered a timelapse tool for my Sony alpha 290 SLR!
Are going to do more timelapses with my Note 3 and Sony Alpha.

Where I live there is epic places to take timelapse!

It's called a "Timelapse" or "Time-lapse", my friend.

I have a few of these. I have some of downtown Chicago that are pretty damn cool.
