Thread: [\[Tutorial\] \[Pics\] How to get someones IP by just giving him a link.](#)

MOBamattie - March 1, 2014, 1:11 am

Hey HF.

This is an tutorial how to get someones IP-adress by just letting him click an link.
First of all You are gonna need an gmail (Only works with gmail i guess)

1. Go to <http://www.whatstheirip.com>
2. You'll see something like this (see picture below)
Spoiler [\(Click to View\)](#)

3. Fill in your GMAIL. Then you'll see this.
Spoiler [\(Click to View\)](#)

4. Give that link to the person you want his ip of. Mostly they'll just click it. When you think he have clicked the link. Check your inbox.
You'll see an e-mail like this
Spoiler [\(Click to View\)](#)

Enjoy :D Please leave a reply if you think this is usefull.

Great guide, be sure to mask your url with bit.ly [WARNING: potentially infected] or ow.ly

MOBamattie - March 1, 2014, 1:36 am

Good one ^^ But when you go to the link it shows "thread does not excist" So you could tell them:
Look at this forum post

or something like that :D

Or just use StatCounter with Tumblr. Much more stealth.
