It's the standard unix crypt... The hash type is blowfish...

W33DSMOK3R - March 1, 2014, 7:52 pm

Sorry my stupidity how can i crack it?

Just give up now. bcrypt/Blowfish is the slowest algorithm i know of. My 7970 gets about 9GH/s on MD5. Thats 9,000,000,000 hashes per second. It gets a total of 4500 hashes per second on blowfish. It's not worth it.

Purchase an uncanny amount of graphics cards or invent a fully functioning quantum computer... Blowfish is slow as fuck compared to MD5... Things like NT/LM are even faster...

W33DSMOK3R - March 1, 2014, 8:20 pm

ok thx am going to roll one up and build a quantum computer, i will tell you guys wen its over.

There's some great research being done that may help a LOT.

W33DSMOK3R - March 1, 2014, 8:31 pm

Thx its a great start. Am going to roll a couple more and try to read it.
