These are web-site templates, created for spreading your "what ever you want to spread". They look pretty legit, so if used right, they can bring you some installs.

Anonymoose Is Legun XD - March 8, 2014, 7:47 am

Where is the config located in the files? I cant find it..

Devsoft™ - March 8, 2014, 10:10 am

Quote:Configuration File is located in "/system/config.php". Open the file, and edit the parameters as you like:

Configuration is included in the 1st template, since its multi-functional. The others are much more simpler, which does not require a configuration, just change link and done.

Anonymoose Is Legun XD - March 8, 2014, 10:11 am

Vouch for this guy. I've already got like 5 slaves in a half hour.

x0r9 - March 10, 2014, 8:30 am

Hi, Uhm how would one install this via wordpress. getting the "Stylesheet is missing" error.

Devsoft™ - March 10, 2014, 8:46 am

(Mar 10, 2014 08:30 AM)x0r9 Wrote: [\[CITE\]](#) Hi, Uhm how would one install this via wordpress. getting the "Stylesheet is missing" error.

It could be because of paths to files. Try using "Static" paths, for example: "http://domain.com/flash_update/filename.ext". U need to replace the paths in either the index.html, or the sample code which handles the popup, according to which way u use.

x0r9 - March 10, 2014, 9:26 pm

EDIT:GOT IT WORKING

Thanks alot works like a charm.

Devsoft™ - March 12, 2014, 5:15 am

You're welcome. I would love to hear some technical feedback tho. Thanks,

ExaFLOPS - March 15, 2014, 6:55 am

Yeah this looks really great. But can I implement my JDB in these templates? As, this one won't automatically execute the file.

In case if you did not know, JDBs are not working anymore for a long time. Well it works for ONLY very old JavaVersions, but the infection rate is very very low, so it can be declared as well as dead.

I was originaly using my websites as JDB, but when it died, i switched to this method.

SWEET_GIRL - April 3, 2014, 3:57 pm

Not a problem, teeeko_80! I am planning to do a new release today as-well, but not yet sure if it will be free or paid. That will depend on the potential of how eazy/much slaves it will be able to get.

Thank you, WingTsun™.

amandaking - October 22, 2014, 4:43 pm

So how do you get visitors to your page to download these?

spidum - October 22, 2014, 4:48 pm

These look amazing. Totally bookmarking this for later. Thanks a LOT!

Devsoft™ - October 22, 2014, 4:56 pm

Thank you! :)

And to "amandaking", you can get visitors in many ways, for example, if you setup the Template, which offers a game download (with YT Video), you can spread your link in the gaming forums/chats/blogs. There are multiple templates, everyone is for different type of victims, for example gamers or free money wanters. Use your imagination. I give you ready tools, you need to use them.

hello, I have a big problem, I need Template #2 but it's not included in the download, where can I find it?

Devsoft™ - January 3, 2017, 11:21 am

Hello Guys!

I have returned after a long break. I am wondering, if there is still some-one out there, who are interested in the spreading pages I released?

If yes, I will refresh the post with new links, since some are expired now.
I will only listen to posters, who are not just registered, and trying to farm posts.

Thanks, WingTsun™.

TheMockingBird - January 3, 2017, 1:52 pm
