Hi you guys,

I'm coming with a new XSS-challenge, now my victim is paihhi.com

It's not a difficult XSS-challenge, it's very easy. 'Cause I'm new mbt Hacking, I though: Mhbm, maybe I can post some XSS-challenges for experience.

So here it is. :D

Much Challenge

There should be a section for XSS challenges since they are so popular

There is also a SQL Injection point. Just putting it out there.

Hmm.. you get me on a idea. I'll contact the provider of these forum.

Just from the first page of threads, I see you have made three separate threads on these challenges. If you must make these, why not make one thread and group them into an "easy, medium, difficult" level within that thread? Saves bandwidth and pisses off less people.
