This E-Book can make you \$200 a DAY on AUTOPILOT. Once you set everything up, which can take you less than a day, you can be making around \$200 a day, with no effort at all. Of course, the more effort you put into it the first day setting it up, the more money you will make.

Alright, so here are the requirements for this:

Able to read English, not huge dictionary words, just regular everyday words.

Have a workable computer that operates...

I can ASSURE you that you have not heard of this method before. There is NO investment required, so once you spend \$10 on this guide, the rest is pure profit!

One more thing. This is blackhat. But this is in no way illegal at all. But if your afraid to bend some simple rules you shouldn't buy this guide. It is all online money making, and you will get paid with paypal, western union, Check. The only thing is it takes 1 month to cashout.

This does not involve:

SEO

PTC

Selling, Buying, Trading

E-Whoring

Ebay, Craigslist, etc.

CPA

uploading (shitcash)

links (adf, linkbuc)

Review 4.5/5

=====

Quality of Information: 5/5 The information in this eGuide was amazing for me to read. I myself am an eBook seller, and not to seem too "gloaty", I have eBooks of a high quality for cheap prices. This eBook was amazing, it teaches you what is needed, marketing, advertising and so much more. I love the way he describes many methods for advertising, many methods for writing etc.

Ease of Use: 4/5 The method in this eBook is obviously auto pilot, since it doesn't require many resources, although the advertising and publicity of your eBooks will require some time, hence why my rating is only at 4/5.

Layout: 4.5/5 I love the layout of this eBook, it's amazing might I say. It's so easy to read, everything is in proportion, it's just amazing at how appealing the layout used is to the eyes.

It's not a 5 though due to no colours.

Grammar: 4.5/5 The grammar in this eBook is amazing. I didn't see MANY spelling mistakes, although there were some. Punctuation, quotation etc is also at a professional level. This eBook is a formal one might I add.

Originality: 4.5/5 I've never seen an eBook like this, and it is his guide. The guide seems to be his method as well.

Notes: I don't really see you making \$1000 USD A MONTH with this, although he never set a time date. I can see you possibly making \$1000 USD in a longer period of time, although you could pull off \$1000 in a month if you are extremely dedicated.

I recommend this eBook 100%, it's an amazing and interesting read, this guide does work, and you can truly make back your money with it.

This is also currently the BEST eBook I've ever reviewed, I'm happy I got it :)

Quality of Information: 3/5 The method is shown and explained.

Ease of Use: 3/5 This seems easy enough.

Layout: 3/5 Layout is fine.

Grammar: 4/5 Grammar is fine.

Originality: 4/5 I haven't seen something like this.

Notes: I plan on doing this. It seems like an easy way of making money. Create a bunch of paypal accounts if need be to dump all your revenue onto your main paypal.

Quality of Information: 3/5 Explained decently, but half the pages aren't mandatory, but very useful

Ease of Use: 3/5 Could take some time to set up the first part, but the rest is easy as pie. First part: 2/5 ; Second part: 4/5

Layout: 2/5 Layout isn't very... exiting, gets the point across well, but boring to read (as stated)

Grammar: 5/5 Grammar isn't a problem, it's pretty well written.

Originality: 4.5/5 I HAVE seen a method using this site, but this is definitely a method I haven't

seen, you'll slap yourself for not thinking of it yourself.

Notes: The overall idea of this method is pretty simple, but is very effective. I face-palmed myself after reading the first sentence (cause I attempted using another method with this site, but never saw it through) but after reading on, the idea is really good. I'd recommend this to people who are looking for a decent income, you may not make 200\$ (actually, I know for a fact you could make more than that TBH) but I would recommend not making that much, as it is a little blackhat.

On a final note, if you really want this method to start off HUGE and setup time taking a LOT less time, a little investment helps (trust me).

I'll post my earnings after finals are over (I hate college) (May 8, 2010 07:25 AM)xbrad Wrote: [\[CITE\]](#) Depending on how much effort you put into this, even the slightest bit more effort can produce a lot more income, will determine how much you will make. If you're a complete lazy ass, you won't make much with this. But you could EASILY make over 200\$/day

Just bought this eBook, will post a review after I read through it.

After reading through it, I can tell that there is definitely money to be made using this method. It's incredibly simple to use, and will only require a (decent) amount of effort to set everything up. The eBook explains exactly what to do and is extremely easy to follow. I haven't seen it before, so we'll see what happens tomorrow when I set it up.

Thanks again Yin for the eBook. :)

Killtacular™ - May 8, 2010, 10:18 pm

My review:

I have to say that this method is excellent for money making. It explains through every step precisely and I believe that this method can really rake in the cash if done correctly. Even though I have seen this site before which he explains in his guide, I definitely didn't know about how to expand on the idea of making money until now. I haven't tested the method out myself but I will definitely set this tactic up tonight or when I have time to.

So thanks for the guide :D

I haven't made 200\$ personally, cause I haven't taken the time to fully set it up. But I have seen/talked to/ whitnessed people making far more then 200\$ with this site, and with this method you could easily make more.

Yin - May 9, 2010, 11:44 am

Sold 8 copies so far, thanks to all.

zetraa - May 9, 2010, 11:45 am

Ah I knew this already :(

Im sure noone else will know this method though, I dont know it from another ebook, just from years of hustling and cashing on the internet.

It does work for sure!!

200\$ a day? Maybe thats aiming to high to stealth whilst blackhatting. But I'm sure its possible..

Really interested in this, but I just have a few questions. How long does it take to set up? Is \$200 the absolute most, and whats the minimum you can receive? Does this money come into PayPal? At the end of the month or any time? Thanks!

How long does it take to set up?

Depends on how quick you can do it. But around 15 minutes on your part then 5 hours autopilot setup.

Is \$200 the absolute most, and whats the minimum you can receive?

Absolutely not! And if you do no work, you make \$0, obviously?

Does this money come into PayPal?

Yes

At the end of the month or any time?

Net 15, so the 15th

Guilt - May 9, 2010, 11:54 am

The time required to set up... depends on how much you want to earn... ^_^ It can be 15mins or 10

hours

zetraa - May 9, 2010, 11:58 am
