Thread: [My niche not getting any clicks when I'm ranked?](#)

?clipse™ - March 4, 2014, 5:20 pm

So I have a niche and I'm ranked on 1st page for one of it's keyword that has 8.1k monthly searches but I'm receiving no clicks at all..

I tried clicking my clicks and they are working and everything and my video is public and also it is not blocked in any country since I used a vpn and checked.

Ideas on what is going on?

Thank you.

Same story here. I have a private niche thats similar to your situation. I get close to 300 views daily and only 4-5 clicks. I have a good website as many have told me. Do not know what it really can be.

Could be many things

- 1) Junk views (get target user groups who need this)
- 2) Not convincing landing page and or website (You want to make it look legit)

Fake your viral stats with fake tweets count and facebook likes. Etc.

How can you get free social signals for Youtube?

Thanks.

More like 4 a day... It's really weird.

Lol U2bviews sucks. I am already registered on it.

I added 10 comments but I only get 2 comments from it..

As for the videos they just don't expire which just shows that it's glitchy. And I don't even know if it's views even work or not lol...
