Why you want LEET?

I feel like LEET would open up a lot of opportunities to contribute to HF.

And I don't want people to see me as another skid or something like that.

What you like about HF?

Well, many people, I'm not saying all the people, cuz' I'd be lying, but most are generous and chill. People are helpful here, and there's really intellectual people here too. I like the community the most. Proof is in the SRPP and the Innuendo section, people proves they are helpful and smart.

Why do you want LEET?

I want to be able to post more posts in the lounge and give reputation to members who deserve it.

What do you like about HF?

I think HF is an awesome place to learn. There are so many forums that thousands of members love. I personally love coding and making music, and there are two forums for that which is awesome and makes me want to come back to the forum a lot. Most members are nice and there are many users who give back to the forum through either donations or by contributing or making useful posts.

Q: Why you want LEET?

A: I have been around here for quite some time, and honestly most of the normal users are just plain newbies who have just started and look for basic things but there are some people who really are passionate about hacking but due to some reason weren't present here earlier. One can easily distinguish between the two by seeing the quality of their posts. Most of the users in second category post HQ tutorials and also behave, i feel they should be rep'ed but i can't do so and also there are many upgraded members who are ill-mannered. I really want to help this situation.

Q: What you like about HF?

A: On HF I admire knowledgeable upgraded users, "the users in the second category", and users who are well behaved and help each other, like there are many users who wont reply to others because the other user corrected them on some topic whom i do not like at all. Over all HF is a nice place where most of the people maintain peace and harmony and has quality moderators who do

their job dutifully.

Thank you for holding this ?

Why do you want LEET?

I want LEET because I feel like it's time I upgraded. I've been here since 2011 now and I would really enjoy getting an upgrade, mostly because of one of it's benefits, which is to change your name. Rushed through it when I first joined, I would just like to get rid of it.

What do I like about HF?

What I like about HF is that it's a very welcoming community, open to all sorts of topics. It's name is HackForums, yet I know close to nothing to hacks yet the community has never stopped to welcome me. From gaming topics to personal/fitness help threads, I enjoy being here every minute.

Thank you for this giveaway and good luck to all the other participants! :)

What you like about HF? I like the diversity of the forums, there is sections about pretty much everything

**Cole ???** - March 5, 2014, 2:13 pm

Just a question. "Normal Users Only" who else can be upgraded to l33t? :P Thanks for hosting this though.

**SocketSeeker** - March 5, 2014, 2:33 pm

The only way I would get enough trust to be able to upload the shit I code to here with the community feeling safe downloading it would be l337. As a dedicated programmer, I would be able to produce some high quality finds and publish them here without me being judged due to my low post count, and l337 would give me the chance to show the community my skills.

HF is a fantastic community, and I enjoy reading up here. The forum is well sorted and easy to navigate through, and most of the community are really nice people willing to contribute and help people in areas of expertise or even just give an honest opinion. My time here has been really positive, and I would like to keep contributing for as long as possible.

**STR™** - March 5, 2014, 5:41 pm

Why you want LEET?

I will contribute to the community by: Continuing help others like I have before and I also plan to do some more giveaways when I get some more items. I also plan to start that HackForums Support

team back up to help people with all the problems they may be having on a school level, personal level, or anything they need help with.

What you like about HF?

Really enjoy spending time on the forum and the users here are amazing. I am most active on the forum hacking/webmaster sections but am also interested in making money. Whether or not I am upgraded I try to participate in events on HackForums and I think i'll never leave it, no matter how old I get. Over all HF is a nice place where most of the people feel their real home

**xtremegamer1882** - March 5, 2014, 10:27 pm

Why I want leet? I would love to have leet because I want to contribute more to the community by making more helpful threads and starting a couple contests

What do I like about HF? I like how I can learn things that I don't know and some of the community is pretty good.

**Harley Quinn** - March 5, 2014, 10:37 pm

Hello, i would love the have l33t becouse it makes people more comfortable about you, they think you are legit, which i am, and i would like to gain access to all the forum. Also i like to give + or - reputation to good and to fraudilient members.

About HF i like the ammount of different topics. I usually am stuck just between hacking and moneymaking, and i see many topics and people that help me with both. I recently "discovered" also new forum subcategories that i visit from now on.

**Shaherin** - March 5, 2014, 11:25 pm

I think you should choose someone based on their current contributions and not randomly. This is not an entry, just a suggestion.

**Xuna** - March 5, 2014, 11:27 pm

Yes, something like that. There are new members posting in this thread with like under 100 posts, i don't think that they should get leet because they haven't had a right feeling of the forum Hackforums. They should get more posts and see if the forum is for them and come back.

**Redemption** - March 5, 2014, 11:29 pm

I want leet because you are able to do more on hackforums and you get more respect. I like that hackforums have nice people who try to help you with your problem.

**Haunter** - March 5, 2014, 11:29 pm

This is a great thing you are doing for the community man. You have my respect.

Why I want to join the GREEN side:

Well at first what comes to mind when I think of L33T is private messaging space. The extra inbox space would be really helpful! I also want to become L33T so that other members don't randomly negative Rep me for no reason. I also want to see what goes on in the upgraded section of the forums. It's a complete mystery to me and I'd love to check it out!

Other reasons:[1]Green is my favorite color!

[2]I spend all of my free time of my day on this forums.

[3]I'd like to be able to thank others for the contributions to the forums.

[4]I want to show off my artistic abilities in my signature bar!

Why I like HF:

Hack Forums is my home, some days I'll spend the entire day browsing the forums talking to other members via PM and enjoying the amazing community. I would be so excited to finally join the L33T family on HackForums. It would be a dream come true for me!

My contributions to Hack Forums: ?

Spoiler ([Click to View](#))

Graphics I've made for HF users.

Note: There are many many other graphic I've made, but I don't have them achieved in my inbox. Due to the 50 message limit.
