1\$ isn't a lot. Idk if you have a website with a theme (probably not)

else try this:

```
Code <html>
<head>
<title>Thank You</title>
<style>
body {
vertical-align:middle;
}
</style>
</head>
<body>
<center>
<h1>Thank you for purchasing this product</h1>
<br><h2>Feel free to purchase something else</h2>
</body>
</html>
```

I can make something better if you have a bit more cash

Pretty sure Center is depreciated, you can center using CSS

Center is depreciated; you're right.

OP, send me a drawing of what you want on the page and I'll make it for free.

No clue, I wrote it on my ipod so I didn't go deep into it. I'm willing to make a better page if you send me a simple PM
