Thread: [CME™ DOS \[DOS SYSTEM\]](#)

Yin - May 8, 2010, 10:23 pm

[img]http://i42.[censored].com/k2bvvgg.png[/img]

Brief Description:

Basically, what you have here is a full on Denial Of Service (DOS) system. It includes a neatly laid out index page; an IP grabber so that you can get the IP of any website no problem. A port scanner so that you can check what ports are open on any IP you like, and finally the DOS shell that includes options to allow you to either specify a port to attack or let the bot choose a random one (the bot will check to make sure the random port is open before attacking). All the pages are laid out neatly and every page has links to every other page allowing you to navigate the site easily. The site is coded in PHP and includes all files necessary to host this system in full, including the images for the header as well as the footer, and can be edited to your liking, or removed completely. When you buy my system you have rights to use, or modify the code for yourself, you do not have permission to distribute my code to anyone (unless you buy reseller rights), however if you decide to host my system, the usage is completely up to you.

Yin is just exploding in the marketplace, good work!

Your threads are nicely laid out and will get a great amount of customers for owners.

kayoh - May 8, 2010, 10:26 pm

All i have to say.Yin strikes again

witchitized - May 8, 2010, 10:28 pm

The www.BLANKED_OUT.com isn't really unnoticeable as the IP is there...and you can easily just get the site by typing the IP into the address bar. Overall a decent product.

Are you selling it yourself, or only referring customers to Eclipse?

I have the script myself if Eclipse isn't on.

CME™ - May 8, 2010, 10:43 pm

Usually I am though, Yin really helped me out by guiding me along the way to creating a good thread. The gfx and some little things like coloring some letters ect. were mine. but the overall layout, all Yin baby. anyways up for sale :)

Yin - May 8, 2010, 10:44 pm

This is really a hard hitting DOS capability too.

BusterCherries - May 8, 2010, 10:45 pm

this is like a http version of silent assassin

apl_L33t® - May 8, 2010, 10:47 pm

I get some set_time_limit error when I use the demo.

BusterCherries - May 8, 2010, 10:48 pm

cuz its a demo T.T lol

Tooth Fairy - May 8, 2010, 10:52 pm

Yin you are rocking the sellers section B-).

it is because of the shitty free host, that i had to park my domain on. My old host (that i had the demo on before) did not throw that error. But they are just warning, and can be ignored. When hosted on a quality host, there is no issues, ill see if I can get a sub-domain from a friend to hos the demo on.

Has anyone bought yet?

I think your shell is sweet....

But I really hate sharing it with a lot of people, because it gets worse and worse..

Pm me?

Yin - May 8, 2010, 11:08 pm

Contact CEM via MSN to purchase. No one has bought yet.

Yin, if you would not mind making that a bit clearer, that would be great :)

Electronical - May 9, 2010, 12:24 am

this works great, vouch for CME and Yin :)

Yin - May 9, 2010, 8:19 am

Made it more clearer.

j00iax - May 9, 2010, 8:25 am

This is on a free webhost,

<http://www.SPAM.com/forum/customer-assistance/16404-problem-dns.html>

Ping the domain gamesaretoohard.com

And you can see its the same link in that thread, !

I believe selling free things is against the rules Yin?

Nohandlebar - May 9, 2010, 8:44 am

I added and pmed it, may buy it. Also, he is hosting the shell for me?

HardWareGuru - May 9, 2010, 8:50 am

Completed with 14300195 (907727.22 MegaBytes) - Running At: 2860039 packets per second

OHSHI-

Is it me or is that what..170GB a sec?

Nice work yin/eclipse.

j00iax - May 9, 2010, 8:54 am

Putting it at 1 second, almost ever shell will do that,

OHSI-

Is it me or is that what..170GB a sec?

Nice work yin/eclipse.thank you.

Please note, i had this question come up yesterday on msn, everything I am selling is 100% all my code, nobody elses. This is not any kind of bash against Yin, helping me layout the thread, and posting the thread is bringing in more potential buyers then I have ever had before.

BaBa Nigger Sheep - May 9, 2010, 9:05 am

Why would anyone pay for this, it's the easiest thing to code.

Take the shell source, change a few stuff. Take the port scanner source add it.

Etc etc.. and just add links to index.html....

Dot Dot - May 9, 2010, 9:07 am

VanquishUK - May 9, 2010, 9:30 am

Im very interested, may i ask were you are hosting this i may buy this but i really would like to know the host please

CME™ - May 9, 2010, 10:05 am

ok, this is getting ridiculous, READ the thread before you post.
