Thread: [Website Coder / Maker / Creator](#)

Ge?ocide - March 8, 2014, 1:17 am

I'm looking for someone who can create a static website for me. It doesn't need to have a login form or what so ever.

It's a school / college website.

Post your price here and number of days you could complete the project. Also please include your portfolio.

I'll pm you if im interested.

Thanks

lilsam - March 8, 2014, 1:25 am

pm me, i think i can do it ..i have enough time this days

I can get you any template you want from this site and then set it all up for you.

How much are you paying?

Deadline?

How many pages?

Does it require custom graphics?

After you answer those 4 questions, I can possibly refer you to my friend who works at a designing company.
