Thread: [\[Help\]MyBB Installation Error](#)

TheUber - March 9, 2014, 8:56 am

Hello everyone,

I just tried installing MyBB about an hour ago. I've done everything correctly. But I'm currently stuck at this point here:

<http://prntscr.com/2zb9b3>

Can anyone please guide/tell me what to do now?

Thanks a lot.

Have you CHMODED the files?

Maybe some files didn't get uploaded?

• ????c???? • - March 9, 2014, 12:10 pm

Make a new database in your cPanel and use that one while installing, seems you are using a db that you have previously used.

TheUber - March 10, 2014, 6:03 am

Tried with a new database and re-uploaded the files too. Still the same error. Should I switch hosts?

• ????c???? • - March 10, 2014, 6:36 am

I would try with a new host, as it seems that the host you are currently with cannot keep up with the changes made within the database.

Dont help this user.

I Gave him a chance at admin and he deletes my theme and forums.

I Made a backup though.

gfg

What are you talking about man? You removed my admin access and banned me for no reason and you also removed me from skype.

Cause you deleted my theme? Its Okay. I Have all my info i need now

TheUber - March 10, 2014, 6:58 am

Go ahead and DDOS me man. I did not do anything.
