<https://hackforums.net/member.php?action=profile&uid=1066842> - Blue Shark

<https://hackforums.net/showthread.php?tid=3718426> - Botnet service.

Paid 100\$ for totally nothing.

Ordered Plasma bot, received only panel first. Hosted on server which is detected by all botnet trackers.

When i started asking for exe-file - 30 minutes of silence and then answer - i have problems with builder, no exe for you.

Then he sent me panel + exe from Solar bot which i didnt asked and didnt ordered and dont need.

Careful.

07.03.2014 19:41:13, Jona

Sir, I have wide range of mining botnets but i suggest you to use Andromeda because Andromeda is one of the best botnet for mining, which is very stable and reliable with that you easily download and execute files(miner) to the bots from andromeda panel and you can also get proxy's from the bots. you can hold very large numbers of bots without any problem.

07.03.2014 19:41:22, Jona

I'll give you domain and hosting with your botnet and will give you builder of your botnet with that you can build your server.exe file your self

07.03.2014 19:41:37, Jona
let me show you some screenshots

Paid 100\$ for totally nothing.

Ordered Plasma bot, received only panel first. Hosted on server which is detected by all botnet trackers.

When i started asking for exe-file - 30 minutes of silence and then answer - i have problems with builder, no exe for you.

Then he sent me panel + exe from Solar bot which i didnt asked and didnt ordered and dont need. Now silence in ICQ for last 2 hours, no answer, nothing.

Careful.

Be patient mate!

EquivalentExchange

Not a problem if he delivers. But looks like not very good action.

Explanation, why its suspicious. When he sent me just a panel and told about builder problem - i've asked for refund (because he dont provided and CANT provide what i've ordered) - first answer - according to my TOS there's no refund :).

It looks very nice, he takes money, doesnt provide order and dont refund. Its called scam.

He provided me only Solar, which i didnt asked and didnt agreed.

And im 100% sure that he will use this option to make me guilty and save his rep :)

We agreed that he installs carberp for me (for additional 200\$). I told him that ill pay after check (ofc, ive paid 100\$ upfront and received NOTHING).

Now he even dont answers to me (but answers to another ppl).

Enough? Or i can post all this logs and screenshots?

I've had the same problem with this user. Cythosia, 1 year hosting, and hosting got shut off January or before. Tried contacting him asking why and he said he would look at it, that was a week ago. I assume he canceled the hosting right after 90 days so I couldn't dispute. DWC

Also OP, make sure you put the UID in the title and to link his profile in the post, as well as provide more proof.

Thanks, added.

By the way all links he provided to me are hosted on <http://anychoice.info>.

This server is listed in all botnet trackers for different botnets.

I think he's using cheap shared hosting and buying \ using public products.

But this time something goes wrong.

I think reselling must be restricted there.

He is using his own hosterdaddy hosting which is hosted probably at <https://www.hetzner.de> [datacenter/germany]. Hosterdaddy is connected to IP address 144.76.39.38 which is hosted on a server that appears to be located in Nuremberg, Germany. Really offshore.

hosterdaddy dns are hosterdaddy.biz if you want them.

I really hope you will get refund. Reselling Plasma, Godaddy domains, nothing offshore/bulletproof, at least he could get you a domain with no personal info, ip on zeus tracker... i don't want to google anymore don't want to find any "offshore" botnets from his customers :)

I hope his next customers will google first what he is selling before buying.

I will get -rep now. START. ?

So thats why i used his own provided chat logs as a proof, so there is no chance to change the chat logs or something.

He also said that I promised him to give the bin or .exe files of plasma bot with the setup, I didn't mention on chat that I will give him .exe, You guys can review all chat logs, which he provided. At Last OP was abusing me on ICQ and I did abuse in return, thats why I deleted him from my contacts. I don't fucking care about \$100, but truth is truth. He also blackmail me to give refund that he blocked my wmz account and wallet, blackmail proofs is down below, Thats not the right way to ask for Refund. At the ending of deal, he said me to setup carpber(which is banking bot/ not allowed on HF, So I didn't answer on it. and I don't want to talk on any banking botnet here, because I always follow the rules and regulations.

But to be honest, if you sell a botnet setup I think its pretty its pretty obvious that you will give him a working botnet? With a .exe etc. I wouldnt call only the panel files for a working setup.
However, this is my opinion. I hope you solve this.

Ok, ill just answer with your words:

And:

Quote:I gave him his plasma bot's login and pass within few mins right after payment.

Manual is a lie. You sent me 1 link which was not working and i sent you message about it.
By the way all ppl there know that botnet is NOT just a web-panel without exe.

So you took money for installing botnet. Installed public panel and told me now to buy builder from owner.

Its not a botnet installation.

By the way:

Quote:At the ending of deal, he said me to setup carpber(which is banking bot/ not allowed on HF, So I didn't answer on it. and I don't want to talk on any banking botnet here, because I always follow the rules and regulations.

And one small moment - you promised me test bots. How you was going to load test bots without providing \ building exe? You sent me empty panel. To have bots here - you need to load exe. You cant build exe. Scam?

You just removed my botnet from hosting and trying now to lie about "fake" scam report?

By the way you are biggest liar.

I've sent PM about dispute closing to admin which you asked me to send it.

Again you are cutting only logs which you want to show :))

Well this is interesting lol :P I want to see who wins

zshconsole - March 13, 2014, 9:08 am

Ok, now we got next situation.

- 1) After first 3 pages of this topic we agreed that Blue Shark installs me Citadel botnet (he was ready to install anything i want, just not to refund).
- 2) Installation was ok, i received botnet and started tests. I've asked, how much time he will provide his service - answer - 3 MONTH (proof in screenshots from my previous message).
- 3) He asked me to close dispute then and send PM's (to close and rename threads) to 2 admins. I was busy that time and sent PM's in 25 minutes after his request.
- 4) Noone of this admins react to this PM's (maybe they are busy? maybe. NOT MY FAULT THAT THREAD NOT CLOSED).

Reaction of BlueShark:

13.03.2014 19:45:29, Jona

I gave you service and you were showing me your attitude every time

This was a reason why he removed my botnet with 8100 bots (i've spent 400\$ to buy them).

And for sure, as usual - HE LIED - look screenshot. When 404 error appears first time i've asked - what's wrong?

Answer: SQL server on updatation. But this time he fully removed my botnet with all bots \ logs.

Now he's wasting my time in ICQ and blaming me :)

PROBLEM NOT SOLVED

In this case i'll agree on ONLY REFUND.

1 day of server working can be excluded from price i've paid (1 day from 90 = 1.5\$).
98.5\$ to refund.

When i will be refunded - i'll leave a message here.

Dont try to lie. You know that i cant rename \ close threads by myself.

You asked me to send PM's to admins. I've sent, as u asked.

ITS NOT MY FAULT OR PROBLEM THAT THEY DONT ANSWER.

BlueShark™ - March 13, 2014, 9:38 am

Recently we talked on ICQ, He gave me the offer of "BET", The most funny part is he backout with his tongue/BET/stake/promise/challenge or whatever you say. Read all truths in Screenshots :)

Well this is now quite Interesting, But this is clear, I don't trust him anymore, he is not trustworthy as per my opinion, and I will denied him for REFUND and continue the DISPUTE.

Also OP, make sure you put the UID in the title and to link his profile in the post, as well as provide more proof.I had the exact same issues same botnet and all.

Gen1e - March 13, 2014, 12:01 pm

all i can say is: "say goodbye to your bots" :D

with \$400 worth of bots you should buy your own hosting and .ru domain..for another \$100 and be a complete owner of everything. You do know that ALL bot sellers have access to your cpanel & domain? In couple of months when you are sleeping they come out of the closet and steal your bots!

Just like underpants gnomes.

He will never resolve it, im sure.

Just check ICQ logs :) It was pretty obviously

Griev?us - April 20, 2014, 3:33 pm

Looks like a legit scam report, I side with OP and seeing with all the issues people have brought of blueshark he seems like a highly untrusted seller.

Unauthenticated - June 14, 2014, 3:04 pm

Yea I talked to him for a bit on skype and he seems to be beyond sketchy, won't deal with this user anymore.

Shanks - June 14, 2014, 3:47 pm

OP is a Skid, I trust Blue shark. This shit is old, close it now.

SN 1006 - *June 15, 2014, 8:00 am*

Blue Shark is a legitimate member. I got a setup from him and he did it smooth and perfect. Even helped me over TeamViewer when I asked for it. I don't believe blue shark scammed this member.

orion.r79 - *June 30, 2014, 11:45 pm*

Blue Shark and Bull are the same scammer. I never get contacts with this Blue Shark, but he leaved -3 to me

even The GRim I dont know who is, never had nothing with him..... but he also leaved -3 to my profile....

Many thanks, very serious !!!!

Hopsin - *July 1, 2014, 4:01 am*

Too bad many regular members get scammed and they can't notify others. (Neutral-negative reputation). Opening an thread won't do much since most people check their "rep" history.
