These look quite nice.

Just curious as to how much encoding/transcoding you can actually do on an RDP with 8 threads, though..

GLWS man.

1. I will get full 32GB ram? Or will I get partial amount of TOTAL 32GB ram? For example, if I buy

the Regular Bronze server, I will get a total of 32GB ram to use right?

2. Any cap on bandwidth usage?

3. Can I use SEO tools like GSA SER on these servers?

Thanks.

I've been using an NL RDP from BoomRDP for several months now with no issues. Whenever something concerning has arisen the support have been extremely quick to help address and resolve it. Previous RDP providers I've used in the past have either dismissed/ignored fixing a problem. The cost of their services are inline with the multitude of other providers, they don't oversell they are more than willing to help make sure you're happy. I highly recommend using them for your RDP needs.

Extremely happy and very satisfied customer.

Is it possible to host game servers on a non-game server RDP? What's the difference between them?

im taking a shot at this and saying that as the game server serves cost more you are allocated more resources as with the normal RDP if you used alot of the cpu/ram that would be considered abuse so if you plan on hosting Games i would not use the normal RDP

?Businessman™ - February 11, 2015, 5:27 am

Purchased from this user. Just awaiting for my RDP. Hopefully it's good.

EDIT: WORST MISTAKE IV'E MADE WITHIN AN HOUR OF MY LIFE.

1. He gave me my login with the wrong password at first.
2. He refused to offer me admin permissions to something I purchased. (I purchased a RDP not an RDP account, there's a big difference here on Hackforums)
3. He offered me no support at all or any conclusion other than it says in the TOS of his website.
4. He blocked me on skype, apparently because of my language, I never swore @ him.

Nowhere on this thread does it say that he would have to install all my programmes for me. Neither did it says that I would not receive admin permissions.

At the end of the day, I purchased a sole server for myself, which only I would have access to. I like to keep everything I do private and personal, I wouldn't like others to take a look into what I'm doing. If I wanted to purchase an RDP with no permissions I would of for like .50c

I'm requesting a Refund or full permissions for the server I purchased.

I cant agree with this i have not had a problem with anything at all, i have asked for programs hes installed them, i asked for ports to be unlocked he did it, and he also does state that only TRUSTED and i must stress it says that on his site will get admin for an extra fee a month. however the support is really quick and for the specs you can not complain.

I contacted the seller before i paid to ask him the questions you said he never told you but yet read the TOS it states it all and after talking to him he seems like a reasonable bloke :)

1. Password was working , If you want to use that as excuse go ahead.
2. We never offered Admin permissions in first place.
3. If you could provide proof of that. It would be Great. Your Bullshit doesn't prove anything.
4. Calling Staff Robbers and other crap is not acceptable. You were just Told to Open ticket if you need any further help.

"Nowhere on this thread does it say that he would have to install all my programmes for me. Neither

did it says that I would not receive admin permissions"

This Explains everything about you. Take a Look at front page ??? It clearly says , If you need Any program Installed Open ticket in Big Bold Letters ?

"I purchased a sole server for myself, which only I would have access to. I like to keep everything I do private and personal, I wouldn't like others to take a look into what I'm doing"

How exactly is it safe for other others if you provide you permissions ???

You need to question yourself before you post something like this. Anyway You got 24 hours to prove your Claims or Your post will be Reported ?

If you account is Blocked. You were obviously Abusing resources?

Simple as that

Please post proof. I was simply running a few IRC clients.

Also there was 0 warning at all. So remember guys don't accidentally use too much otherwise pop just blocked with no warning and message about it.

Staff wouldn't Disable unless you are Raping the CPU/RAM simple as that. Users do get Warning on server + Logins back when they Open ticket. So stop assuming things ?

It was Disabled so other users doesn't have to face problems created by one User. No point Arguing here and explaining yourself that you accidentally use too much. Just reply to Ticket Matter of seconds you will get access back?

U rent 1 Server and let 10-20-30-40 or i dont know how many people "work" on this server? lol...
If anyone just starts cracking on this with a nice wordlist and many threads its over for the others or not?

Im searching for a RDP for cracking purposes. But i would try to max the used resources to make it most profitable.

So your RDP isnt the right one for me, i think?

We have good few users who use it for cracking without any problem. I am not sure about your second part. If you are talking about fully using the whole server at max then its not allowed. You may get yourself a Dedicated server. ?

if i rented this dedibox would i be sharing its resources with anyone else, or would I have sole access to its specs. Not just a sectioned part of it?

Just wondering as i wouldnt want piss poor performance becauase some other person is hogging resources. would i get the exsact specs i pay for ie 64gb ram and so forth. and not maybe 12 because some other dudes running lots of gash on it? Could you pm me info please?

okay i just read more posts it appears you share them.

how many ppl share any 1 given server?

Thanks for responding to me via pm, very professional response times.

I was interested in these to host a game server on, is that possible?

It would be one of the higher end RDP's

Also can you please tell me how many people do you load onto 1 box?

Can i use hitleap on it?

So many users would have access to my rdp?RDP hosting is basically shared hosting in a way. Basically you get your RDP login then you have access to your user folder and the drive they assigned you. You can't view other people's shit and they can't view your shit.

Have you tested running heavy modded minecraft servers on these guys?

Jayzzz - December 18, 2015, 3:40 am

Thr RDP is 32GB Ram but I think the RAM and all resources is shared between 35+ more people. The user will not even get 1GB Ram to use. I have used like \$3 RDP and this one is even worse than that. The RDP is lagging even after changing resolution. Please look at it

You cant install any software neither copy and paste anything from pc it shows access denied. What kind of RDP is that please solve it or refund me

Update The connection gets lost in every 30 minutes seriously

Edit-

Buffy - December 19, 2015, 2:55 pm

You made a huge damn mistake bro the 32GB Ram is for all name all resources are shared you might not even get 1GB Ram because he is sharing one VPS between many people.

Buffy - December 20, 2015, 4:15 am

I didn't even receive anything yet, and it's been over 30 hours, so overall a scam. Too bad I paid with BTCs.

Its still there in your post. Do you need tutorial by any chance ?

BobDarling - February 4, 2016, 5:43 pm

With more than 6 year of study, and ~8 year working in IT domain, i would say that your proposing of tutorial is indecent.

I can't access your server through rdp, on 3 different computer, with 3 different internet access.
what proof do you want ?

Image full removed. Sry about that ip leak.

Edit : I'm stuck at "Securing the connection" step in rdp client. I would say, cpu issue. Good luck about that.

Edit2 : acceded right now, waiting for desktop display....

Edit3 : "connection lost, trying to reconnect"

Edit4: black screen again, waiting for desktop

Edit5: waiting for desktop since 1min.

Edit6: connection state given by rdp client : "Connection is very slow, UDP activated". No desktop, waiting for it.

Edit7: Seem to connect, waiting on login screen.

Edit8: "connection lost, retrying"

Edit9: FORCE REBOOT THAT SERVER ! Some process is taking 100% of cpu in one of the user session.

Edit10: thank's you for the force reboot :)

Edit11: Please say me how much CPU and ram i can use without having problem with you. I will use between 70% and 90% of cpu, below 10GB of ram and 30mbps/in-5-10mbps/out of bandwidth until new informations.

Firstly ,

I haven't offered any Tutorial on how to connect in first place.. Even if you need it there is a Video on the first page of the post which i believe you never read. If you did you would have realized about Set up time which was clearly listed Upto 24 hours.. Which you claimed " Has been over 24 hours and still waiting" something along those lines when you received login less than 8 hours infact.

Secondly ,

You claimed that your account was banned and some how magically you are logged in now and using the RDP. Te be more specific this is what you said "my password won't work, and the site don't send new password on request". We never received any new password request in first place and I just checked why it was stuck on securing the connection. Obvious clue that you left us was asking us to check for CPU. In which you have been using the maximum of 86% hence the problem..

Take a look at TOS and AUP

Yep, but if i can't run even with low settings my apps on your server, i'll ask for a refund by all mean in my (small) power.

We'll see where this is taking us..

I know i have been a bit aggressive about that case. But if you need any sysadmin to work for you, i candidate (with real name, and everything).

1MPERATOR - May 17, 2016, 3:12 am

I ordered an RDP like a week ago.

In this time the RDP went offline twice. I am not sure how often this will happen, but it does not look good. To be more exact: twice in three days. The answer of their support was clear: "make sure to save your work every 24 hours".

I order an RDP because I can not let my PC run for the entire time. I am using the RDP to check out Instagram profiles, to spot for new posts. When the RDP is down, even though I save the work every 24 hours, there is no use for me.

I hope the crashes will not happen anymore. Let's pray for the best.

Im still waiting for my order to go through, he was on a flight according to his previous posts. I think some payments have to be manually marked as paid, so if you have paid rest assured you have not lost your money.

I fully respect people cannot be online 24/7, but when you run a business and fail to at least notify its customers I feel is piss poor. Hopefully he gets online sometime soon, as far as his 'staff' I dont think he has any other than himself.

still waiting for my rdp to be setup , its been way more than 24 hours.

SIM-1483313 - July 8, 2016, 11:04 am

Just bought a fresh RDP yesterday - The setup times seems to take a while at this point in time tho'
:(

However I've been using BoomRDP rather frequently for over a year now and I'd like to vouch for this RDP provider.

I've received excellent support throughout this past year and I've yet to have any complaints what so ever.

Possibly interested, how many users do you have on each server, at maximum?

protege - November 11, 2016, 6:33 pm

sent you a pm regarding this

Gigabot - November 18, 2016, 11:59 am

purchased an rdp 24+ hours ago.....havent gotten it yet.....

Gigabot - November 20, 2016, 4:51 pm

Still haven't received my rdp and ticket was ignored. Im gonna have to chargeback if i dont receive this soon ?

x0176852 - November 21, 2016, 6:22 am

The VPS have unlimited bandwith??

myth0z - November 22, 2016, 3:17 am

I'm also waiting for login details. Bought around 15 hours ago.

ColtyTheGod - February 12, 2017, 11:55 am

Just ordered a RDP still waiting to receive.

redmoon90211 - February 12, 2017, 6:31 pm

where is the \$6.99 plan ? I can't find it ?

ColtyTheGod - February 13, 2017, 4:57 am

Support 5/10 servers 10/10, Servers are quick but support is really slow. 7/10 in total.

This is getting ridiculous now user hasn't replied to my ticket that I sent in on 13/02/17 at 00:27.....
brilliant servers though.

Mi2414 - February 19, 2017, 9:57 am

Bought a regular NL RDP and I'm still waiting, opened a ticket aswell. I can provide payment proof if needed aswell.

Gonna have to dispute this, such a shame.

Kat? Upton - February 19, 2017, 5:42 pm

This is probably the slowest support on HF so far.

? You were Refunded long time back..

pmaster10 - March 3, 2017, 4:54 pm

be careful everyone all of booms rdps haven't been working for the past 24 hours and their domain got suspended today. Had 5 more days and this is the only way to contact them now i guess.

Boom

jeremykonst - March 6, 2017, 4:32 pm

Dude seriously 12 days later and no service after signing up and I file a dispute with paypal and then you give me service. I want my money back I clear stated I wanted a return in the dispute. WTF

Forehead - April 25, 2018, 4:04 pm

In the same boat as @jeremykonst. It's been over a week and no reply back to messages and the server has yet to be set up. I want a refund.

OnlyAccounts - April 30, 2018, 8:39 pm

Don't buy from this guy he is a SCAMMER!

Forehead - May 7, 2018, 3:08 pm

Update: Don't buy from this user as it's been a month+ and no RDP not setup and tickets not replied. Do not deal

travisci - May 16, 2018, 5:12 pm

do you have Windows 2016 Server Core? and if not, can you install it on the machines?

Please, do you have Australia RDP.

cla4cky - January 13, 2019, 1:50 am

is Bandwidth UNMETERED in RDP?

juanpirata - January 13, 2019, 10:10 am

hello, now buy this product, amazing, but not auto delivery? please send me mp

OMG i pay invoice , but the system says, NOT PAID

LOL

GLWS88 - January 18, 2019, 6:25 pm

Bought a Rdp but never received it. I paid via PayPal and it still tells me I haven't paid.
